During the years 1903-1914, Ramanujan recorded many of his mathematical discoveries in notebooks without providing proofs. Although many of his results were already in the literature, more were not. Almost a decade after Ramanujan's death in 1920, G.N. Watson and B.M. Wilson began to edit his notebooks but never completed the task. A photostat edition, with no editing, was published by the Tata Institute of Fundamental Research in Bombay in 1957. This book is the second of four volumes devoted to the editing of Ramanujan's Notebooks. Part I, published in 1985, contains an account of Chapters 1-9 in the second notebook as well as a description of Ramanujan's

quarterly reports. In this volume, we examine Chapters 10-15 in Ramanujan's second notebook. If a result is known, we provide references in the literature where proofs may be found; if a result is not known, we attempt to prove it. Not only are the results fascinating, but, for the most part, Ramanujan's methods remain a mystery. Much work still needs to be done. We hope readers will strive to discover Ramanujan's thoughts and further develop his beautiful ideas.

The intersection of human rights and artificial intelligence (AI) in healthcare represents a critical area of discussion as technological advancements reshape the medical field. AI offers the potential to revolutionize healthcare delivery by improving diagnostic accuracy, personalizing treatment plans, and streamlining administrative tasks. However, its integration into healthcare systems raises ethical and human rights concerns. Issues like data privacy, algorithmic bias, informed consent, and equitable access to AI-driven care must be carefully considered to ensure that AI

technologies uphold the rights of patients. Striking a balance between innovation and human rights is essential for ensuring AI contributes to more inclusive and accountable healthcare systems, where dignity and autonomy are respected, and health outcomes are improved without discrimination. As AI becomes embedded in healthcare, establishing frameworks for ethical governance and human rights protections will be critical. Intersection of Human Rights and AI in Healthcare explores the intersection between AI and healthcare, with a focus on the human element and ethical considerations. It delves into the implications of AI on human skills, the future workforce, and the role of ethical development in healthcare applications. This book covers topics such as ethics and law, patient safety, and policymaking, and is a useful resource for government officials, policymakers, healthcare professionals, academicians, scientists, and researchers.

Routledge Community-engaged scholarship is an equitable and democratic approach to scholarship that seeks to identify and solve community-based problems. Community-engaged scholars aim to serve the public good by developing and sustaining community-campus partnerships built on trust, reciprocity, and mutual benefit. As universities orient themselves towards serving the public good, they face a number of challenges: faculty and students may not possess the competencies or commitment to build fruitful community partnerships, graduate and undergraduate students may lack the necessary training and mentorship required to develop their identity as community-engaged scholars, and institutional leaders may not know how to

One of the most pressing issues in contemporary China is the massive rural land takings that have taken place at a scale unprecedented in human history. Expropriation of land has dispossessed and displaced millions for several decades, despite the protection of property rights in the Chinese constitution. Combining meticulous doctrinal analysis with in-depth historical investigation, Chun Peng tracks the origin and evolution of China's rural land takings law over the twentieth century and demonstrates an enduring tradition of land takings for state-led social transformation, under which the takings law is designed to be power-confirming. With changed socio-political circumstances and a new rights-respecting

constitutional agenda, a rebalance of the law is now underway, but only within existing parameters. Peng provides a piercing analysis of how land has been used by the largest developing country in the world to develop itself, at what costs and where the future might be.
