"In this landmark effort to understand African American people in the New World, Gunnar Myrdal provides deep insight into the contradictions of American democracy as well as a study of a people within a people. The title of the book, An American Dilemma, refers to the moral contradiction of a nation torn between allegiance to its highest ideals and awareness of the base realities of racial discrimination. The touchstone of this classic is the jarring discrepancy between the American creed of respect for the inalienable rights to freedom, justice, and opportunity for all and the

pervasive violations of the dignity of blacks. The appendices are a gold mine of information, theory, and methodology. Indeed, two of the appendices were issued as a separate work given their importance for systematic theory in social research. The new introduction by Sissela Bok offers a remarkably intimate yet rigorously objective appraisal of Myrdal--a social scientist who wanted to see himself as an analytic intellectual, yet had an unbending desire to bring about change. An American Dilemma is testimonial to the man as well as the ideas he espoused. When it first appeared An American Dilemma was called "the most penetrating and important book on contemporary American civilization" by Robert S. Lynd; "One of the best political commentaries on American life that has ever been written" in The American Political Science Review; and a book with "a novelty and a

courage seldom found in American discussions either of our total society or of the part which the Negro plays in it" in The American Sociological Review. It is a foundation work for all those concerned with the history and current status of race relations in the United States."--Provided by publisher.

Microeconomics in Context lays out the principles of microeconomics in a manner that is thorough, up to date, and relevant to students. Like its counterpart, Macroeconomics in Context, the book is uniquely attuned to economic, social, and environmental realities. The "In Context" books offer affordability, accessible presentation, and engaging coverage of current policy issues from economic inequality and global climate change to taxes and globalization. Key features include: Clear explanations of basic concepts and analytical tools, with advanced models presented in

optional chapter appendices; Presentation of policy issues in historical, environmental, institutional, social, political, and ethical contexts—an approach that fosters critical evaluation of the standard microeconomic models, such as welfare analysis, labor markets, and market competition; A powerful graphical presentation of various measures of well-being in the United States and other countries, including income inequality, taxes, educational attainment, and environmental quality; Broad definitions of well-being using both traditional economic metrics and factors such as environmental quality, health, equity, and political inclusion; Significantly revised chapters on globalization and trade, economic and social inequality, labor markets, and public goods; Expanded coverage of high-interest topics such as behavioral economics, labor markets, and economic discrimination; Full complement of instructor and student support materials online. This new edition also features more international data and analysis, and further material on the importance of economic power in shaping policy. The latest addition to the "In Context" series combines real-world relevance with a thorough grounding in multiple economic paradigms. This edition further reflects the fact that this impact is now a reality, with a special focus on the nonprofit management and marketing strategies in India and South Asia. Features: • Increasing pressure on government agencies and nonprofit organizations to adopt business models and frameworks to guide their operations • The prominence of the concept of 'social enterprise' as a way of thinking about the ventures that both social and commercial entities are undertaking • Witnessing of major

developments pertaining to corporate social responsibility leading to a substantial increase in the number of not-for-profit organizations in several South-Asian countries • Significant increase in dialogue between not for profit organizations, corporate world, government, and regulators Table of Contents: SECTION I: DEVELOPING A TARGET AUDIENCE ORIENTATION 1 Chapter 1: The Growth and Development of Nonprofit Marketing Chapter 2: Developing a Target Audience-Centered Mindset SECTION II: STRATEGIC PLANNING AND ORGANIZATION Chapter 3: Strategic Marketing Planning Chapter 4: Understanding Target Audience Behavior Chapter 5: Acquiring and Using Marketing	Information Chapter 6: Segmentation, Targeting, and Positioning Chapter 7: Branding SECTION III: DESIGNING THE MARKETING MIX Chapter 8: Value Propositions: Managing the Organization's Offerings Chapter 9: Developing and Launching New Offerings Chapter 10: Managing Perceived Costs Chapter 11: Facilitating Marketing Behaviors Chapter 12: Formulating Communication Strategies Chapter 13: Managing Communications: Advertising and Personal Persuasion Chapter 14: Managing Public Media and Public Advocacy SECTION IV: DEVELOPING RESOURCES Chapter 15: Generating Funds Chapter 16: Attracting Human Resources: Staff, Volunteers, and Board Members Chapter 17: Working with the Private	Sector SECTION V: ORGANIZING AND CONTROLLING MARKETING STRATEGIES Chapter 18: Organizing for Implementation Chapter 19: Marketing Evaluation, Monitoring, and control The Resettlement Administration Routledge This book examines the low level of numeracy in Britain, reasons why numeracy is critical, and the forces affecting adults. Section 1 describes the educational environment in which adults learn mathematics. Chapters 1-2 explore the role and purposes of adult education and identify characteristics of and influences on learners and teachers. Section 2 outlines the wider disciplinary, social, political, and cultural context. Chapters 3-7 examine the following: underlying beliefs about numeracy; learners, teachers, and curriculum; their goals and effect on learning and teaching approaches of cultural, political,
--	---	--

and educational forces and experiences or philosophies of mathematics. Section 3 looks at factors affecting adults learning mathematics. Chapters 8-15 explore the following: the low level of adults' confidence and knowledge of mathematics; the fundamental damage this may do to a democratic society; the concept of discourse and its use in teaching mathematics to adults; the importance of recognizing and valuing diversity through culture; and how adults acquire very effective practical mathematics skills located in their own lives and culture but have difficulty transferring them into formal academic mathematics. Section 4 (chapter 16) builds on an increased awareness of the framework in which adults learn mathematics to move to developing a more emancipatory curriculum. The book contains 362 references and an index. (YLB)

The sweeping changes brought about in 2017 to practice and procedures in European Union trade mark law have precipitated a new edition of this much relied-upon guide to the field. This is the first book to provide comprehensive guidance to the new EU Trade Mark Regulation, including full details on all aspects of substance and procedure, as well as to the new Trade Mark Directive. This new and significantly expanded edition, which builds on the two previous editions of the Concise European Trade Mark and Design Law, includes the full texts of the new Implementing and Delegated Acts - available in no other book - as well as a collection of other texts that are needed in daily practice, such as excerpts from the Rules of Procedure of the General Court, the Paris Convention, the Madrid Protocol and the Nice Agreement,

the Nice Classification, the TRIPS Agreement and the Directive on Enforcement of IP Rights. Providing a complete commentary and a full set of the legal provisions that must be dealt with on a daily basis, obviating recourse to other sources, this new edition will be welcomed by anyone with an interest in the law and practice of trade marks in the European Union.

Why kakapo is the only parrot in the world that cannot fly, or why the kiwi lives here and nowhere else? New Zealand is an

extraordinary place, unique on earth, and the remarkable story of how and why life evolved here is the subject of *Ghosts of Gondwana*. The challenge of explaining New Zealand's natural origins is picked up in this fully revised edition of the popular award-winning book. It presents the latest scientific research in highly readable form, highlighting studies that reveal the deep historical background of our landscapes, fauna and flora - from ancient frogs and moa to delicate insects and the magnificent southern beech forests. It introduces the latest discoveries and resolves past issues like the 'Oligocene drowning' hypothesis. Exciting fossil discoveries are revealed and new scientific technologies and approaches to the discipline of historical biogeography are discussed - approaches that range from undersea geology to molecular clocks - and it inevitably draws attention to the debates and conflicts that distinguish different schools of opinion in this holistic branch of theoretical science. This revision incorporates the results of 10 years of intensive scientific research and includes four entirely new chapters to: focus on 'yesterday's maps' to draw attention to the ephemeral islands in our history that have possibly acted as stepping stones for terrestrial animals and plants but today have sunk into the sea; incorporate the author's own special interest in an ancient group of 'jaw-moths', unknown and unnoticed by most people but with a strong message that New Zealand is part of the world when it comes to explaining where our fauna have come from; present recent research findings on our huge flightless birds, the ratites; and include New Zealand's terrestrial molluscs into the story.

Ghosts of Gondwana identifies New Zealand as one of the most challenging places on earth to explain, but it's readable, engaging style and revised illustrations render this often-controversial discipline of science into a format that is accessible to any reader with an interest in natural history and the unique environment of New Zealand.

Public Documents HSRC Press "The definitive

guide to a technology that succeeds or fails depending upon our ability to accommodate societal context and structures. This handbook is lucid, integrative, comprehensive and, above all, prescient in its interpretation of GIS implementation as a societal process." - Paul Longley, University College London

"This is truly a handbook - a book you will want to keep on hand for frequent reference and to which GIS professors should direct students entering our field... Selection of a few of the chapters for individual attention is difficult because each one contributes meaningfully to the overall message of this volume. An important collection of articles that will set the tone for the next two decades of discourse and research about GIS and society." - Journal of Geographical Analysis

Over the past twenty years research on the evolving relationship between GIS and Society has been expanding into a wide variety of topical areas, becoming in the process an increasingly challenging and multifaceted endeavour. The SAGE Handbook of GIS and Society is a retrospective and prospective overview of GIS and Society research that provides an expansive and critical assessment of work in that field. Emphasizing the theoretical, methodological and substantive diversity within GIS and Society research, the book highlights the distinctiveness and coherence of the subject as a field of study, while also examining its resonances with and between key themes, and among disciplines ranging from geography and computer science to sociology, anthropology, and the health and environmental sciences.

Comprising 27 chapters, often with an international focus, the book is organized into six sections:

- Foundations of Geographic Information and Society
- Geographical Information and Modern Life
- Alternative Representations of Geographic Information and Society
- Organizations and Institutions
- Participation and Community Issues
- Value, Fairness, and Privacy

Aimed at academics,

researchers, postgraduates, and GIS practitioners, this Handbook will be the basic reference for any inquiry applying GIS to societal issues.

Academic life is complex and adjusting to life as a new academic requires a range of skills and abilities to fulfil the multiple roles the academic must play as researcher, teacher and administrator. An Academic Life assists in the process of

orienting new academics to the nature of academic life, particularly greater accountability in all aspects of academic life, growth in the numbers of academic staff, and increasing demands and expectations from the growing student population. This title addresses the key areas of academic work: teaching and learning; research, research training and publication; administration and community service; and the social and cultural aspects of academic life. Robert Cantwell and Jill Scevak have brought together new academics and experienced educators from a variety of discipline backgrounds to provide clear and practical insights into the journey of entering the world of academic life. Any new academic will find this book an invaluable resource for conceptualising and contextualising the academic world they are now part of. At one time, every new lecturer thinks, 'I wish there was a handbook on how to be an academic'. With the publication of *An Academic Life* there finally is! The case studies add hugely to the accessibility of the theoretical materials and help to limit the isolation of the new academic feeling, 'Why does this only happen to me!' The book provides the foundational questions a new staff member should think about when constructing courses, organising their workload and thinking strategically about a long-term academic career. I would highly recommend it Dr Kathleen Butler senior Lecturer, Centre for Teaching and Learning, University of Newcastle

World History Teaching in Asia is the first broad survey of the content and approaches used to teach world history in secondary schools and colleges in Asia. The collection has been crafted by scholars and educators whose goal was to shed light on the importance of history education and to foster understanding of and between Asian countries. These essays show how the teaching of world history in Asian countries has developed since World War II, with many interesting parallels, including the issue of Eurocentrism, but also distinctive national trends, and considerable changes over time. At a time when many Asian countries are making great strides in education, this study of history education in Asia will be of real interest to educators, history scholars, and policy-makers worldwide.
