16-2 Evolution as Genetic Change A genetic view of evolution offers a new way to look at key evolutionary concepts If each time an organism reproduces, it passes copies of its genes to its offspring... We can therefore view evolutionary fitness as an organism ' s success in passing genes to the next generation We can also view an evolutionary adaptation as any genetically controlled physiological, anatomical, or behavioral trait ...

16 – 2 Evolution as Genetic Change Natural selection acts on individuals. Evo-lution acts on populations. Natural selec-tion acting on individuals leads to the evolution of populations. Natural selection on a trait controlled by a single gene with two alleles can cause one allele to increase and the other allele to decrease. Natural selection on polygenic
