The Significance of the Frontier in American History W. W. Norton

By the year 2110, the world's population driven to self-destruction, thanks to wealthy elitists, corrupt politicians and bankers, and greedy, self-serving progressives. Systemic greed and corruption within the halls of various governments and banks set in motion the engine of humanity's downfall. These organisations have incited wars and conflicts between tribes, religions, and countries, causing horrendous deaths, pain, and suffering for billions of innocent people. Humankind is facing destruction. To combat this, six time travellers from the year 2612 emerge out of stasis with the goal of preventing a nuclear disaster set to occur in 2111. With the advantage of hindsight, they visit six key historical events. They hope to persuade people of influence to make subtle changes to their thinking and actions. If all six events can be nudged in a slightly different direction, the impending man-made destruction might be averted. Only time will tell whether the time travellers can overcome their two biggest enemies, ego and self-importance, to prevent stupid mistakes from building a critical mass of human horror and causing humankind's extinction. In this science fiction novel, six people from the future arrive in the year 2111 seeking to prevent the destruction of humanity through intervention in key historical events.

Notes on the State of Virginia McDougall Littell/Houghton Mifflin

"A World in the Making is a kind of anthropological journey taken by four historians that assumes all societies are "hot," and all people make history and always have. We argue in our emphasis on lives and livelihoods for a world constructed, altered, renovated, remade by ordinary people even as we acknowledge the genius of individual innovators, disruptors who broke the mold or struck out in some new direction."--Provided by publisher.

Classic Books Library presents this brand new edition of "The Federalist Papers", a collection of separate essays and articles compiled in 1788 by Alexander Hamilton. Following the United States Declaration of Independence in 1776, the governing doctrines and policies of the States lacked cohesion. "The Federalist", as it was previously known, was constructed by American statesman Alexander Hamilton, and was intended to catalyse the ratification of the United States Constitution. Hamilton recruited fellow statesmen James Madison Jr., and John Jay to write papers for the compendium, and the three are known as some of the Founding Fathers of the United States. Alexander Hamilton (c. 1755 – 1804) was an American lawyer, journalist and highly influential government official. He also served as a Senior Officer in the Army between 1799-1800 and founded the Federalist Party, the system that governed the nation's finances. His contributions to the Constitution and leadership made a significant and lasting impact on the early development of the nation of the United States.

The colorful anecdotes, first-person quotations, and trademark wit bring American history to life. The 16th edition includes a major revision of Part Six (the period from 1945 to the present), reflecting recent scholarship and providing greater thematic coherence. The authors also condensed and consolidated material on the Wilson presidency and World War I (formerly Chapters 29 and 30) into a new single chapter. A new feature, "Contending Voices," offers paired quotes from original historical sources, accompanied by questions that prompt students to think about conflicting perspectives on controversial subjects. Additional pedagogical aids make THE AMERICAN PAGEANT accessible to students: part openers and chapter-ending chronologies provide a context for the major periods in American history, while other features present additional primary sources, scholarly debates, and key historical figures for analysis. A People's History of the United States Penguin UK Before the 99% occupied Wall Street... Before the concept of social justice had impinged on the social conscience... Before the social safety net had even been conceived... By the turn of the 20th Century, the era of the robber barons, Andrew Carnegie (1835-1919) had already accumulated a staggeringly large fortune; he was one of the wealthiest people on the globe. He guaranteed his position as one of the wealthiest men ever when he sold his steel business to create the United States Steel Corporation. Following that sale, he spent his last 18 years, he gave away nearly 90% of his fortune to charities, foundations, and universities. His charitable efforts actually started far earlier. At the age of 33, he wrote a memo to himself, noting "...The amassing of wealth is one of the worse species of idolatry. No idol more debasing than the worship of money." In 1881, he gave a library to his hometown of Dunfermline, Scotland. In 1889, he spelled out his belief that the rich should use their wealth to help enrich society, in an article called "The Gospel of Wealth" this book. Carnegie writes that the best way of dealing with wealth inequality is for the wealthy to redistribute their surplus means in a responsible and thoughtful manner, arguing that surplus wealth produces the greatest net benefit to society when it is administered carefully by the wealthy. He also argues against extravagance, irresponsible spending, or self-indulgence, instead promoting the administration of capital during one's lifetime toward the cause of reducing the stratification between the rich and poor. Though written more than a century ago, Carnegie's words still ring true today, urging a better, more equitable world through greater social consciousness.

Signed in 1848, the Treaty of Guadalupe Hidalgo ended the war between the United States and Mexico and gave a large portion of Mexico's northern territories to the United States. The language of the treaty was designed to deal fairly with the people who became residents of the United States by default. However, as Richard Griswold del Castillo points out, articles calling for equality and protection of civil and property rights were either ignored or interpreted to favor those involved in the westward expansion of the United States rather than the Mexicans and Indians living in the conquered territories.

Since its original landmark publication in 1980, A People's History of the United States has been chronicling American history from the bottom up, throwing out the official version of history taught in schools -- with its emphasis on great men in high places -- to focus on the street, the home, and the workplace. Known for its lively, clear prose as well as its scholarly research, A People's History is the only volume to tell America's story from the point of view of -- and in the words of -- America's women, factory workers, African-Americans, Native Americans, the working poor, and immigrant laborers. As historian Howard Zinn shows, many of our country's greatest battles -- the fights for a fair wage, an eight-hour workday, child-labor laws, health and safety standards, universal suffrage, women's rights, racial equality -- were carried out at the grassroots level, against bloody resistance. Covering Christopher Columbus's arrival through President Clinton's first term, A People's History of the United States, which was nominated for the American Book Award in 1981, features insightful analysis of the most important events in our history. Revised, updated, and featuring a new afterword by the author, this special twentieth anniversary edition continues Zinn's important contribution to a complete and balanced understanding of American history.
