Sanctions as War is
the first critical

analysis of economic sanctions from a global perspective. Featuring case studies from 11 sanctioned countries and theoretical essays, it will be of immediate interest to those interested in understanding how sanctions became the common sense of American foreign policy.

Literary Culture and U.S. Imperialism Monthly Review Press

The Routledge Handbook of Muslim-Jewish Relations invites readers to deepen their

understanding of the historical, social, cultural, and political themes that impact modern-day perceptions of interfaith dialogue. The volume is designed to illuminate positive encounters between Muslims and Jews, as well as points of conflict, within a historical framework. Among other goals, the volume seeks to correct common misperceptions about the history of Muslim-Jewish relations by complicating familiar political narratives to include dynamics such as the cross-influence of literary and

intellectual traditions. Reflecting unique and original collaborations between internationally-renowned contributors, the book is intended to spark further collaborative and constructive conversation and scholarship in the academy and beyond. From the Revolution to World War II Routledge The principal ambition of this book is to provide an avowedly eclectic, although largely political, explanation of American and British

imperialism, as comprehensive and ultimately as unified as that offered by Marxist interpretations. Geopolitical considerations are assumed to be basic (but not exclusive) concerns of foreign policy elites in Britain and the United States; and the ability of people in Latin America, Africa and Asia to coordinate their activities, that is, to act politically, is assumed to be the

central (but not sole) feature determining the character of their response to Western imperialism. The book provides profiles of various southern political regimes and categorises their different reactions to the impact of imperialism in the nineteenth century and to the impetus for decolonisation after 1945. The author concludes by considering the dilemma

of American policy toward the Third World in the early 1980s, when traditional modes of conduct can no longer prescribe a clear plan of action. The Great Debate, 1890-1920 Rowman & Littlefield
Decolonization revolutionized the international order during the twentieth century. Yet standard histories that present the end of colonialism as an inevitable transition from a world of

empires to one of nations—a world in which self-determination was synonymous with nation-building—obscure just how radical this change was. Drawing on the political thought of anticolonial intellectuals and statesmen such as Nnamdi Azikiwe, W.E.B Du Bois, George Padmore, Kwame Nkrumah, Eric Williams, Michael Manley, and Julius Nyerere, this important new account of decolonization reveals the full extent of their unprecedented ambition to

remake not only nations but the world. Adom Getachew shows that African, African American, and Caribbean anticolonial nationalists were not solely or even primarily nation-builders. Responding to the experience of racialized sovereign inequality, dramatized by interwar Ethiopia and Liberia, Black Atlantic thinkers and politicians challenged international racial hierarchy and articulated alternative visions of worldmaking. Seeking to create an egalitarian

postimperial world, they attempted to transcend legal, political, and economic hierarchies by securing a right to self-determination within the newly founded United Nations, constituting regional federations in Africa and the Caribbean, and creating the New International Economic Order. Using archival sources from Barbados, Trinidad, Ghana, Switzerland, and the United Kingdom, *Worldmaking after Empire* recasts the history of decolonization,

reconsiders the failure of anticolonial nationalism, and offers a new perspective on debates about today ' s international order.

Five Centuries of the Pillage of a Continent

Peter Lang

This book, the product of a unique international scholarly collaboration sponsored jointly by the American Council of Learned Societies and the Soviet Academy of Sciences, provides a comprehensive survey on international banking from 1870 to 1914. In that period

international investment reached dimensions previously unknown, and the banking systems of the world achieved a degree of internationalization without precedent. The book's authors, twenty-five scholars from fifteen countries, are the acknowledged experts in their fields. They detail the origin and development of internationally oriented banks in each major country, and explain their role in foreign investment and industrial finance. They look at all areas of the world that were involved in

international investment, either as investors, recipients of investment, or both. The definitive work on international banking from 1870 to 1914, this book will interest scholars and students in financial and banking history, bankers and economists in the financial industry, and general historians.

Modern Chinese Warfare, 1795-1989 University of Pennsylvania Press

Provides an examination of the relationship between the core capitalist countries and the rest of the world in the age of neoliberal globalization.

Deploying a Marxist methodology, Smith begins by tracing the production of certain iconic commodities--the T-shirt, the cup of coffee, and the iPhone--and demonstrates how these generate enormous outflows of money from the countries of the Global South to transnational corporations headquartered in the core capitalist nations of the Global North. From there, Smith draws on his empirical findings to theorize the current shape of imperialism. He argues that the core capitalist countries need no longer rely on military force and colonialism (although these still occur) but increasingly are able to extract

profits from workers in the Global South through market mechanisms and, by aggressively favoring places with lower wages, the phenomenon of labor arbitrage. --From publisher description.

The Highest Stage of Capitalism Edward Elgar Publishing

Radicals in the Barrio uncovers a long and rich history of political radicalism within the Mexican and Chicano working class in the United States. Chacón clearly and sympathetically documents the ways that migratory workers carried with them radical political

ideologies, new organizational models, and shared class experience, as they crossed the border into southwestern barrios during the first three decades of the twentieth-century. Justin Akers Chacón previous work includes *No One is Illegal: Fighting Racism and State Violence on the U.S.-Mexico Border* (with Mike Davis).

Institutional Incentives and Imperial Expansion Princeton University Press

[In this book, the author's] analysis of the effects and causes of capitalist underdevelopment in Latin America present [an] account of ... Latin American history.

[The author] shows how foreign companies reaped huge profits through their operations in Latin America. He explains the politics of the Latin American bourgeoisies and their subservience to foreign powers, and how they interacted to create increasingly unequal capitalist societies in Latin America.-Back cover.

Research Handbook on Law and Marxism

Ravenio Books

The nineteenth century marked the high point of imperialism, when tsarist Russia expanded to the Pacific and the sun was

said never to set on the British Empire. Imperialism remains a perennial issue in international relations today, and nowhere is this more evident than in the intensifying competition for global resources. Leo J. Blanken explains imperialism through an analysis of the institutions of both the expanding state and its targets of conquest. While democratic states favoring free trade generally resort to imperialism only to preempt aggressive

rivals—or when they have reason to believe another state’s political institutions will not hold up when making bargains—authoritarian states tend toward imperialism because they don’t stand to benefit from free trade. The result is three distinct strategies toward imperialism: actors fighting over territory, actors peaceably dividing territory among themselves, and actors refraining from seizing territory altogether.

Blanken examines these dynamics through three case studies: the scramble for Africa, the unequal treaties imposed on Qing Dynasty China, and the evolution of Britain's imperial policy in India. By separating out the different types of imperialism, Blanken provides insight into its sources, as well as the potential implications of increased competition in the current international arena.

Cultural Imperialism
BRILL

From Egyptian mythology to Jewish mysticism, Rome and Greece to the druids and the gnostics, Tim Wallace-Murphy exposes a fascinating lineage of hidden mysteries and secret societies, continuing through the Templars, Rosicrucians, and Freemasons to our modern visionaries. This hidden stream of spirituality and that of sacred knowledge are inseparably entwined to form the single most

important continuous strand in the entire Western esoteric tradition. This tradition exerted a seminal influence on the thinking of the builders of the great cathedrals; leading teachers in ecclesiastical schools; philosophers; playwrights; poets such as Shakespeare, Goethe, Blake, and W. B. Yeats; and on artists and Renaissance giants such as Leonardo da Vinci and Michelangelo. It is also the root from which sprang

alchemy and modern science. Now, as more people are looking to find information on the alternatives to dominant religions and dogmas that have told us what to think and how to behave, as faith has been questioned by religious scandals, economic meltdowns, and an increasingly sick planet Earth, Wallace-Murphy reveals the secrets of the masters, including invaluable spiritual insights into everyday life that have been hidden throughout

the ages. He shows us who kept this spiritual tradition alive despite appalling persecution, so that we in the twenty-first century might benefit from its accumulated fruits and ennoble our lives. Hidden Wisdom will be of immense interest to readers of the number one bestseller *The Lost Symbol* as it explains much of Dan Brown's focus on the ancient mysteries. Tim Wallace-Murphy is an international best-selling author known

for his deep knowledge of Rosslyn, the Knights Templar, Sacred Geometry, and *Rex Deus. Globalization, Super-Exploitation, and Capitalism's Final Crisis* University of Chicago Press
"Warfare has long been recognised as central to a proper understanding of the classical world, where, as the philosopher Heraclitus observed, war was 'both king and father of all.' More recently, however, an approach to the ancient world solely in such terms has been challenged. War was indeed pervasive, and was a

prominent theme among poets and historians; but there was also a distinct value placed on peace, which might be understood not only as the absence of war but as an ideal to be imagined, instituted, and even imposed. This volume places peace at the centre of its concerns and explores classical ideas of peace as both an abstract concept the practical methods of conflict resolution"--Provided by publisher.

Free Trade and its

Reception 1815-1960

Oxford University Press

Paul Kennedy's classic

naval history, now updated

with a new introduction by the author This acclaimed book traces Britain's rise and fall as a sea power from the Tudors to the present day. Challenging the traditional view that the British are natural 'sons of the waves', he suggests instead that the country's fortunes as a significant maritime force have always been bound up with its economic growth. In doing so, he contributes significantly to the centuries-long debate between 'continental' and 'maritime' schools of strategy over Britain's policy in times of

war. Setting British naval history within a framework of national, international, economic, political and strategic considerations, he offers a fresh approach to one of the central questions in British history. A new introduction extends his analysis into the twenty-first century and reflects on current American and Chinese ambitions for naval mastery. 'Excellent and stimulating' Correlli Barnett 'The first scholar to have set the sweep of British Naval history against the background of economic

history' Michael Howard, Sunday Times 'By far the best study that has ever been done on the subject ... a sparkling and apt quotation on practically every page' Daniel A. Baugh, International History Review 'The best single-volume study of Britain and her naval past now available to us' Jon Sumida, Journal of Modern History
How Democracy Serves the Rich

The series Beihefte zur Zeitschrift für die alttestamentliche

Wissenschaft (BZAW) covers all areas of research into the Old Testament, focusing on the Hebrew Bible, its early and later forms in Ancient Judaism, as well as its branching into many neighboring cultures of the Ancient Near East and the Greco-Roman world.
Freedom and Trade: Volume One NYU Press
This book brings together researchers in international communication and global media studies to revisit and advance the concept of media imperialism for 21st century research. Using cases across the globe, this volume is

essential for understanding communications media in unequal economic, geopolitical and cultural-ideological power relations.
The United States, Great Britain and the Late-Industrializing World Since 1815 World View Forum Pub
V.G. Kiernan is recognised as one of the most remarkable historians of the 20th. Sensitive to the tragic and ironic character of human history, he addresses the origins, consequences and legacies of modern imperialism and colonialism.

Persistent Questions in Public Discussion Penguin UK

A survey of Chinese warfare, both internal and international, from the opium wars of the 1840s through to the end of Vietnam.

Imperialism Walter de Gruyter

This book examines the Corn Laws and their repeal. It brings together leading international experts working in the field from Britain, Europe and the United States. Their contributions range widely

over the history, politics and economics of free trade and protectionism in the nineteenth and twentieth centuries; together they provide a landmark study of a vitally important subject, and one which remains at the top of today's international agenda.

Market Elections Courier Corporation

The essays presented in this collection consider a wide range of cultural, social and intellectual topics specific to British History from the mid-19th to the mid-20th century.

The book attempts to show the centrality of the Empire in the history of various nations created by the British diaspora overseas. It examines numerous topics relating to British history, including the history of the old self-governing Dominions -- Canada, South Africa, New Zealand and Australia -- and seeks to uncover the true nature of how British Imperial history has been written. Rejecting a nostalgic point of view, these essays

written by leaders in the field, are cast in a critical light asking the reader to evaluate the historiographical context of British history.

Imperialism and Its

Contradictions University of Calgary Press

The purpose of this Book to present the public at large a brief overview, in a simple and easily readable language, of the various stages of the construction of the European Union of 27 European nations plus the Britain as an islander in Europe. The Book consists

of a Prologue and twenty-five (25) chapters and supported by Bibliography. Chapter 1 consists of Introduction. Chapter 2 consists of Construction of Europe in the Ancient Period. Chapter 3 consists of Overview of Europe in the Middle Ages. Chapter 4 consists of Brief Overview of Early Modern Europe. Chapter 5 consists of Overview of the Period of Scio-Economic and Political Changes in Europe. Chapter 6 consists of Overview of the Imperialism Period: Colonial Empires. Chapter 7 consists of Overview of World War I

and its Aftermath. Chapter 8 consists of Overview of World War II and its Aftermath. Chapter 9 consists of Origin and Definition of European Union. Chapter 10 consists of Post-War European Inregation or Coperation. Chapter 11 consists of a Critical Look at European Unity. Chapter 12 consists of Structure of the European Integration. Chapter 13 consists of the Schuman Plan and the European Coal and Steel Community. Chapter 14 consists of Overview of the Council of

Europe. Chapter 15 consists of a Brief Overview of Parliament of The European Union. Chapter 16 consists of a Brief Overview of Cabinet of the President of the European Union. Chapter 17 consists of a Brief Study of European Commission of the EU. Chapter 18 consists of A Critical Look at Decision Making Process of The European Union. Chapter 19 consists of Overview of The European Court of Justice. Chapter 20 consists of Brief Overview Of The European Court Of Auditors. Chapter 21 consists of the Continent and Britain in the Age of European Integration. Chapter 22 consists of Britains's Disintegration from Europe: the 23 June 2016 Refrendum. Chapter 23 consists of Chronological Milestones of the Construction of Europe. Chapter 24 consists of Will the Structure of European Union Crumble? Chapter 25 consists of Summary and Conclusion. The book is supported by Bibliography. I earnestly hope that the matters raised in this Book will help the intended readers to understand the construction of various stages of European Union. This Book, however, is not intended to provide impetus to the realization of certain definite ends on the subject and not at all a document for expert professionals, such as: economists; constitutional experts; political analysts, or other specialists. Each chapter of this Book is intended to stand alone so that the reader can refer to the chapter which deals with his or her specific area of interest. Hence some

repetition may occur. If the reader wishes to gain further knowledge and deep understanding of the subject, he or she is directed to consult the scholastic work of the authors in the bibliography.

Theory, History, and the Present John Wiley & Sons

This book examines in a basically chronological context the interesting issues, events, ideas, and organizations that were a part of American anti-imperialism and stresses the thought of the leading anti-imperialists in relation
