HarperCollins

The Cold War shaped the world we live in today - its politics, economics, and military affairs. This book shows how the globalization of the Cold War during the last century created the foundations for most of the key conflicts we see today, including the War

on Terror. It focuses on how the Third World policies of the two twentieth-century superpowers - the United States and the Soviet Union - gave rise to resentments and resistance that in the end helped topple one superpower and still seriously challenge the other. Ranging from China to Indonesia, Iran, Ethiopia, Angola, Cuba, and Nicaragua, it provides a truly global perspective on the Cold War. And by exploring both the development of interventionist ideologies and the revolutionary movements that confronted interventions, the book links the past with the present in ways that no other major work on the Cold War era has

succeeded in doing.

Exiting the Cold War, Entering a New World
Random House Digital, Inc.

The most powerful force in the world economy today is the redefinition of the relationship between state and marketplace - a process that goes by the name of privatization though this term is inadequate to express its far-reaching changes. We are moving from an era in which governments sought to seize and control the 'commanding heights' of the economy to an era in which the idea of free markets is capturing the commanding heights of world economic thinking. Basic views

of how society ought to be organized are undergoing rapid change, trillions of dollars are changing hands and so is fundamental political power. Great new wealth is being created - as are huge opportunities and huge risks. Taking a worldwide perspective, including Britain, where the process began with Mrs Thatcher, Europe and the former USSR, China, Latin America and the US, THE COMMANDING HEIGHTS shows how a revolution in ideas is transforming the world economy - why it is happening, how it can go wrong and what it will mean for the global economy going into the twenty-first century.

China Among Unequals presents asymmetry theory, a new paradigm for the study of international relations, derived from China's relationships with its neighbors and the world. The first collection of its kind, it brings together key writings on the theory and its

applications to China's basic foreign policy, particularly towards the United States and the rest of Asia. Starting with an exploration of the general theory of asymmetry, with particular attention given to such topics as human rights, soft power, regionalism, and asymmetric wars, the book then moves on to the fundamentals of China's external relations, looking at the complexities created by its scale and broad range of neighbors. Traditional imperial relationships are analyzed, as well as China's more recent emphasis on multipolarity. The third section deals with US-China ties - China's most important relationship, and the only one in which it is in the more vulnerable position. The final section treats in detail the relationships between China and its Asian neighbors, including Southeast Asia and the complicated multilateral situations of Korea and Taiwan.

The book examines the role of Western broadcasting to the Soviet Union and Eastern Europe during the Cold War, with a focus on Radio Free Europe and Radio Liberty. It includes chapters by radio veterans and by scholars who have conducted research on the subject in once-secret Soviet bloc archives and in Western records. It also contains a selection of translated documents from formerly secret Soviet and East European archives, most of them published here for the first time.

Council of War World Scientific
The definitive history of the Cold War and its impact around the world We tend to think of the Cold War as a bounded conflict: a clash of two superpowers, the United States and the Soviet Union, born out of the ashes of World War II and coming to a dramatic end with the collapse of the Soviet Union. But in this major new work, Bancroft Prize-winning scholar Odd Arne Westad argues that the Cold War must be understood as a global ideological confrontation, with early roots in the Industrial Revolution and ongoing

repercussions around the world. In The Cold War, Westad offers a new perspective on a century when great power rivalry and ideological battle transformed every corner of our globe. From Soweto to Hollywood, Hanoi, and Hamburg, young men and women felt they were fighting for the future of the world. The Cold War may have begun on the perimeters of Europe, but it had its deepest reverberations in Asia, Africa, and the Middle East, where nearly every community had to choose sides. And these choices continue to define economies and regimes across the world. Today, many regions are plagued with environmental threats, social divides, and ethnic conflicts that stem from this era. Its ideologies influence China, Russia, and the United States; Iraq and Afghanistan have been destroyed by the faith in purely military solutions that emerged from the Cold War. Stunning in its breadth and revelatory in its perspective, this book expands our understanding of the Cold War both geographically and chronologically, and offers an engaging new history of how today's world was created.

A World History Cold War Broadcasting Impact on the Soviet Union and Eastern Europe

During the Cold War, freedom of expression was vaunted as liberal democracy 's most cherished possession—but such freedom was put in service of a hidden agenda. In *The Cultural Cold War*, Frances Stonor Saunders reveals the extraordinary efforts of a secret campaign in which some of the most vocal exponents of intellectual freedom in the West were working for or subsidized by the CIA—whether they knew it or not. Called "the most comprehensive account yet of the [CIA 's] activities between 1947 and 1967" by the *New York Times*, the book presents shocking evidence of the CIA 's undercover program of cultural interventions in Western Europe and at home, drawing together declassified documents and exclusive interviews to expose the CIA 's astonishing campaign to deploy the likes of Hannah Arendt, Isaiah Berlin, Leonard Bernstein, Robert Lowell, George Orwell, and Jackson Pollock as weapons in the Cold War. Translated into ten languages, this classic work—now with a new preface by the author—is "a real

contribution to popular understanding of the postwar period" (*The Wall Street Journal*), and its story of covert cultural efforts to win hearts and minds continues to be relevant today.

This book explores how the socially disputed period of the Cold War is remembered in today 's history classroom. Applying a diverse set of methodological strategies, the authors map the dividing lines in and between memory cultures across the globe, paying special attention to the impact the crisis-driven age of our present has on images of the past. Authors analysing educational media point to ambivalence, vagueness and contradictions in textbook narratives understood to be echoes of societal and academic controversies. Others focus on teachers and the history classroom, showing how unresolved political issues create tensions in history education. They render visible how teachers struggle to handle these challenges by pretending that what they do is ' just history '. The contributions to this book

unveil how teachers, backgrounding the political inherent in all memory practices, often nourish the illusion that the history in which they are engaged is all about addressing the past with a reflexive and disciplined approach.

"The Frontline presents a selection of essays drawn together for the first time to form a companion volume to Serhii Plokhy's *The Gates of Europe and Chernobyl*. Here he expands upon his analysis in earlier works of key events in Ukrainian history, including Ukraine's complex relations with Russia and the West, the burden of tragedies such as the Holodomor and World War II, the impact of the Chernobyl nuclear disaster, and Ukraine's contribution to the collapse of the Soviet Union. Juxtaposing Ukraine's history to the contemporary politics of memory, this volume provides a multidimensional image of a country that continues to make headlines around the world.

Eloquent in style and comprehensive in approach, the essays collected here reveal the roots of the ongoing political, cultural, and military conflict in Ukraine, the largest country in Europe."

A fierce critique of civil religion as the taproot of America's bid for global hegemony Pulitzer

Prize – winning historian Walter A. McDougall argues powerfully that a pervasive but radically changing faith that "God is on our side" has inspired U.S. foreign policy ever since 1776. The first comprehensive study of the role played by civil religion in U.S. foreign relations over the entire course of the country's history, McDougall's book explores the deeply infused religious rhetoric that has sustained and driven an otherwise secular republic through peace, war, and global interventions for more than two hundred years.

From the Founding Fathers and the crusade for independence to the Monroe Doctrine, through World Wars I and II and the decades-long Cold War campaign against "godless Communism," this coruscating polemic reveals the unacknowledged but freely exercised dogmas of civil religion that bind together a "God blessed" America, sustaining the nation in its pursuit of an ever elusive global destiny.

This is a semi-autobiographical account of a fighter pilot in the

RAF from 1962 to 1994. He was both a Hunter and Harrier pilot, rose to Squadron Leader level, and commanded fighter and strategic reconnaissance units. He was CO of the Desert Rescue Team, flew Dakotas on desert supply running, and saw active fighter service receiving bullet holes in his aircraft during the Aden Radfan campaign. He flew Cold War covert reconnaissance missions, commanded the Harrier unit in Belize, spent the Gulf War working with the US Defense Intelligence Agency, and became a nuclear weapons specialist. The book includes inside accounts of army support missions on the Yemen border, flying cold war reconnaissance missions in Europe, early day conversion to Harriers without any training aids, and long range ultra-high-level, covert photo intelligence gathering sorties, including helping police and customs with airborne photography, most notably for the 2nd Moors Murder Inquiry. It also includes political, geographical and economic background of all the places in which he served, and comments on political and military decisions made at those times.

Ranging from Geneva to Pyongyang, this remarkable book takes readers on an odyssey through one of the most extraordinary forgotten tragedies of the Cold War: the

"return" of over 90,000 people, most of them ethnic Koreans, from Japan to North Korea from 1959 onward. Presented to the world as a humanitarian venture and conducted under the supervision of the International Red Cross, the scheme was actually the result of political intrigues involving the governments of Japan, North Korea, the Soviet Union, and the United States. The great majority of the Koreans who journeyed to North Korea in fact originated from the southern part of the Korean peninsula, and many had lived all their lives in Japan. Though most left willingly, persuaded by propaganda that a bright new life awaited them in North Korea, the author draws on recently declassified documents to reveal the covert pressures used to hasten the departure of this unwelcome ethnic minority. For most, their new home proved a place of poverty and hardship; for thousands, it was a place of persecution and death. In rediscovering their extraordinary personal stories, this book also casts new light on the politics of the Cold War and on present-day tensions between North Korea and the rest of the world.

Military Medical Ethics, Volume 2 Basic Books

As the challenge of preventing military conflict has become increasingly complex in the post-Cold War era, economic sanctions are being applied with growing frequency. Sanctions are

also being used to enforce international law, to deter aggression and terrorism, to defend democracy and human rights, and to prevent nuclear proliferation. This study addresses questions about the utility, appropriateness and success or failure of sanctions, as well as their impact on the poor and innocent. Specific case studies, focusing on recent conflicts such as those in Haiti, Iraq, South Africa and the former Yugoslavia, demonstrate the principal aspects of economic sanctions.

This is the milestone official comprehensive history of the United States Air Force with compelling stories about America's airmen and their aircraft. This document, Volume II, picks up the narrative at the Korean War, takes it through the War in Southeast Asia, the Gulf War, to the drawdown following the end of the Cold War. Part IV: A Decade of Deterrence, 1950-1960 * Chapter 13 - The Air War over Korea * Chapter 14 - The Emergence of the Strategic Air Command * Chapter 15 - The Air Force as an Institution * Chapter 16 - Containing Communism * Part V: The War in Southeast Asia, 1960-1975 * Chapter 17 - Flexible Response: Evolution or Revolution? * Chapter 18 - The Air Force and Operations Short of War * Chapter 19 - The War in Southeast Asia, 1961-1968 * Chapter 20 - Vietnamization and Withdrawal, 1968-1975 * Part VI: Regrouping after Vietnam, 1975-1982 * Chapter 21 - Modernizing after Vietnam * Chapter 22 - Carrying Out National Policy * Part VII: The Post-Cold War Era, 1982-1997 * Chapter 23 - Peace is not Always Peaceful * Chapter 24 - From the Deserts to the Mountains * Chapter 25 - Metamorphosis: The Air Force Approaches the Next Century

More than any other military organization, the U.S. Air Force searches out and listens to the experience history offers. Few problems arise from a void or occur without precedent; and while every challenge possesses its unique aspects, the perspective of time and the careful consideration of what already has succeeded or failed inevitably improves the effectiveness of today's decisions and the quality of planning for the future. History is therefore important to the Air Force; the recorded past is a foundation for doctrine, policy, strategy, tactics, equipment development, organization, force structure, and virtually every other element of air power. This volume, published in commemoration of the fiftieth anniversary of the Air Force as an independent service, is especially valuable. Not only should it both inspire and enlighten the members of the Air Force, it should also serve as a convenient source of information for those outside the service who are interested in the origin, growth, evolution and application of American air power.

Throughout its first century, military aviation helped advance the interests of the United States. From a curiosity, fragile and of uncertain value, the warplane has become a devastating weapon. Moreover, ballistic missiles and surveillance satellites have joined aircraft in this aerial array. In these volumes, we try to describe and analyze, in the context of national policy and international rivalries, the evolution of land-based air power since the United States Army in 1907 established an Aeronautical Division responsible to the Chief Signal Officer. This work, in addition to commemorating the Air Force's fiftieth anniversary, also commemorates almost one hundred years of progress in the design and use of aerial weaponry. By placing airmen and their machines in an appropriate context, it provides a clearer understanding of the central role of the Air Force in current American defense policy. Early in the conceptualization of this work, we decided that a collaborative effort would make the best use of whatever special skills or knowledge each of us might

possess. We knew, however, that successful collaboration requires a plan, and the blueprint was the work of Warren A. Trest, then the chief of the Histories Division, Office of Air Force History. He devised a basic outline for the book, and after his transfer elsewhere in the Air Force history program, Bernard C. Nalty saw the design through to its completion. Under the general guidance of these two, we wrote, reviewed, and revised each chapter. A panel of historians and military officers reviewed the manuscript, which then underwent the final revisions that these distinguished individuals suggested. This book explores how and why the dangerous yet seemingly durable and stable world order forged during the Cold War collapsed in 1989, and how a new order was improvised out of its ruins. It is an unusual blend of memoir and scholarship that takes us back to the years when the East-West conflict came to a sudden end and a new world was born. In this book, senior officials and opinion leaders from the United States, Russia, Western and Eastern Europe who were directly involved in the decisions of that time describe their considerations, concerns, and pressures. They are joined by scholars who have been able to draw on newly declassified archival sources to revisit this challenging period.

An associate justice on the renowned Warren Court whose landmark ruling in *Brown v. Board of Education* overturned racial segregation in schools and other public facilities, Tom C. Clark was a crusader for justice throughout his long legal career. Among many tributes Clark received, Supreme Court Chief Justice Warren Burger opined that "no man in the past thirty years has contributed more to the improvement of justice than Tom Clark." Supreme Court Justice Tom C. Clark is the first biography of this important American jurist. Written by his daughter, Mimi Clark Gronlund, and based on

interviews with many of Clark's judicial associates, friends, and family, as well as archival research, it offers a well-rounded portrait of a lawyer and judge who dealt with issues that remain in contention today—civil rights, the rights of the accused, school prayer, and censorship/pornography, among them. Gronlund explores the factors in her father's upbringing and education that helped form his judicial philosophy, then describes how that philosophy shaped his decisions on key issues and cases, including the internment of Japanese Americans during World War II, the investigation of war fraud, the Truman administration's loyalty program (an anti-communist effort), the Brown decision, *Mapp v. Ohio* (protections against unreasonable search and seizure), and *Abington v. Schempp* (which overturned a state law that required reading from the Bible each day in public schools).
