This text is specifically designed to meet the needs of those teaching and learning interviewing and diagnostic skills in clinical, counselling, and school psychology, counselor education, licensed clinical social workers, and other programs preparing mental health professionals. It offers a rich array of practical, hands-on, class- and workshop-tested role-playing and didactic exercises. The profiles included throughout provide students/trainees with a wealth of information about each client's feelings, thoughts, actions, and relationship patterns on which to draw as they proceed through the different phases of the initial interview, one playing the client and one the interviewer. Each client profile is followed by exercises that highlight attending, asking open and closed questions, engaging in reflective listening, responding to nonverbal behavior, making empathetic comments, summarizing, redirecting, supportively confronting, and commenting on process. This second edition is based on the new diagnostic system (DSM-5-TR) and all profiles and case examples are updated. Throughout, the author emphasizes the importance of understanding diversity and respecting the client's perceptions, and of reflecting on the ways in which the interviewer's own identity influences both the process of interviewing and that of diagnosis. This text is essential for both students and practitioners of clinical psychology, counselling, psychiatry, nursing, social work, and other allied professions. Grounded in author Allen Frances's extensive clinical experience, this comprehensive yet concise guide helps the busy clinician find the right psychiatric diagnosis and avoid the many pitfalls that lead to errors. Covering every disorder routinely encountered in clinical practice, Frances provides the appropriate ICD-9-CM code for each one (the same code utilized in the DSM), a useful screening question, a colorful descriptive prototype, lucid diagnostic tips, and a discussion of other disorders that must be ruled out. The book closes with an index of the most common presenting symptoms, listing possible diagnoses that must be considered for each. Frances was instrumental in the development of past editions of the DSM and provides helpful cautions on questionable aspects of DSM-5. **Interviewing and Diagnostic Exercises for Clinical and Counseling Skills Building** Elsevier Health Sciences

Diagnostic Essentials of Psychopathology: A Case-Based Approach by Cheree Hammond brings together dozens of fictional cases which represent a range of human experiences, featuring people of different ages, ethnicities, genders, ability levels, and religions. Each disorder has several cases associated with it to capture the truly unique nature of working with various client intersections, and half of the cases provide the correct "answers" or diagnosis to allow students to check their understanding of this process. Some cases focus on a diagnosis, others with analysis, and others let the student practice on their own as a way to further student reflection and learning. This casebook is specifically written for disciplines that are grounded in a humanistic approach (Counseling, Social Work, Counseling Psychology). The author provides a framework for using the medical model that is presented in the DSM-5.
