Since its original landmark publication in 1980, *A People's History of the United States* has been chronicling American history from the bottom up, throwing out the official version of history taught in schools -- with its emphasis on great men in high places -- to focus on the street, the home, and the workplace. Known for its lively, clear prose as well as its scholarly research, *A People's History* is the only volume to tell America's story from the point of view of -- and in the words of -- America's women, factory workers, African-

Americans, Native Americans, the working poor, and immigrant laborers. As historian Howard Zinn shows, many of our country's greatest battles -- the fights for a fair wage, an eight-hour workday, child-labor laws, health and safety standards, universal suffrage, women's rights, racial equality -- were carried out at the grassroots level, against bloody resistance.

This selection of papers by scholarly specialists offers an introduction to the history of the

book and book culture in West Asia and North Africa from antiquity to the 20th century. The flourishing and long-lived manuscript tradition is discussed in its various aspects - social and economic as well as technical and aesthetic. The very early but abortive introduction of printing - long before Gutenberg - and the eventual, belated acceptance of the printed book and the development of print culture are explored in further groups of papers. Cultural, aesthetic, technological, religious, social, political and economic factors are all considered throughout the volume. Although the articles reflect the predominance in the area of Muslim books - Arabic, Persian and Turkish - the Hebrew, Syriac and Armenian contributions are also discussed. The editor ' s introduction provides a survey of the field from the origins of writing to the modern literary and intellectual revivals.

No other radical historian has reached so many hearts and minds as Howard Zinn. It is rare that a historian of the Left has managed to retain as much credibility while refusing to let his academic mantle change his beautiful writing style from being anything but direct, forthright, and accessible.

Whether his subject is war, race, politics, economic justice, or history itself, each of his works serves as a reminder that to embrace one's subjectivity can mean embracing one's humanity,

that heart and mind can speak with one voice. Here, in six sections, is the historian's own choice of his shorter essays on some of the most critical problems facing America throughout its history, and today.

Egyptian Origin of the Book of Revelation

A Synopsis of the Bura Project
The three major rationale for writing this book are primarily to: through the study of African language family groups trace the origin of the tribe to a more specific location rather than the diffused response of 'from the East?'; secondly to investigate why and how the word

'Pabir/Babur?' came on the scene referring to a separate ethnic group different or the same as the Bura and thirdly to document some of the vanishing Bura cultural practices and deeds. For example what their beliefs are, their marriage practices, local industries and what they do to pass time. It is my strong belief that the first objective is accomplished through our analysis and presentation of the Proto-Afro-asiatic linguistic family classification group and its subgroup the Proto-Chadic of which the Biu-Mandara forms a sub-branch. Through a systemic and vigorous study of the classification of the different languages comprising this Proto Family of languages and its sub-branches we are able to assert that the Bura people were among many other ethnic groups part of a group whose origin can be traced to the Levant region of south west Asia and the Middle-East. They

belong to the group that forms ?back to Africa migration?. This is because modern genetic studies of languages indicate that they?re the only group that have traces of Y chromosome belonging to haplogroup R1b R-V88 in Africa but found mainly in Asia and Europe. After tracing the influences of the powerful Kanem (ca. 700-1376) and later Bornu-Kanem (1380-1893) empires around the Lake Chad region as well as the kingdom of Mandara (founded in about 1459, i.e. end of the 15th century), in what is today modern Cameroon on the inhabitants of the region, we conclude a chaotic period of migrations and wars, including trade in slaves. It is through this prism that we notice the emergence of the founder of the Woviri dynasty of Biu. Through his failure to win the Maiship of Bornu, he moved to Mandara and then the Plateau of Biu with some of his followers or relatives. Being a student of History Abdulahi or who later became Yamta-ra-wala attempted to replicate what the Kanembu were able to do among the local people they conquered some centuries earlier; they created an ethnicity and language called Kanuri. Yamta-ra-wala succeeded somewhat, but wasn't able to completely conquer the Bura people and turn them in his new ethnic vision. Instead the Buras went to the hills to fight him the next day. The new breed he created he called ?Pabir? or Babur as the Hausa would call them. The myth of who Yamta-ra-wala is has for the present eclipsed historians and would probably continue for some time to come. As for the Bura (Most have down the hill-tops and mountains!) and the Pabir they have never been closer than today. Today for all practical purposes they are one and the same ethnic group, they?ve intermingled more than any two previously separated groups.

Their vocabulary, phonology and cultural practices have fused into one in most instances.

Far off the coast of California looms a harsh rock known as the island of San Nicholas. Dolphins flash in the blue waters around it, sea otter play in the vast kelp beds, and sea elephants loll on the stony beaches. Here, in the early 1800s, according to history, an Indian girl spent eighteen years alone, and this beautifully written novel is her story. It is a romantic adventure filled with drama and heartache, for not only was mere subsistence on so desolate a spot a near miracle, but Karana had to contend with the ferocious pack of wild dogs that had killed her younger brother, constantly guard against the Aleutian sea otter hunters, and maintain a precarious food supply. More than this, it is an adventure of the spirit that will haunt the reader long after the book has been put down. Karana's quiet courage, her Indian self-reliance and acceptance of fate,

transform what to many would have been a devastating ordeal into an uplifting experience. From loneliness and terror come strength and serenity in this Newbery Medal-winning classic.

"This is History Book. It explored the grand scheme of world history as a product of real-life human beings pursuing their individual and collective interests. It also offered a global perspective on the past by focusing on both the distinctive characteristics of individual societies and the connections that have linked the fortunes of different societies. It has combined a clear chronological framework with the twin themes of traditions and encounters, which help to make the unwieldy story of world history both more

manageable and more engaging. From the beginning, *Traditions & Encounters* offered an inclusive vision of the global past—one that is meaningful and appropriate for the interdependent world of contemporary times" -- *The Zinn Reader* Macmillan Higher Education

This edited volume explores the various views on the origins of tetrapods--amphibians, reptiles, birds, and

mammals--views that agree or differ depending in part on how certain fossil animals are classified and which methodology is used for classification. Eighteen chapters by an international group of paleontologists and neontologists here present current hypotheses, emphasizing the kinds of data needed to answer controversial questions, as well as the variety of solutions that emerge from different analyses of the same data set. The book is arranged in five sections, each of which contains an overview essay that either describes the development of various schools of thought regarding the origin of the tetrapod group in question or critically summarizes the arguments presented in the section. The first section addresses the origins of tetrapods as a

group, focusing on lobe-finned fishes and early tetrapods. Next is a section dealing with amphibians, followed by one on reptiles. The fourth section concerns avian origins, and the final section treats the origins and early diversification of mammals. With an overall goal of stimulating critical evaluation by the reader rather than providing unequivocal answers, this volume will be of particular interest to vertebrate paleontologists, evolutionary morphologists, and ichthyological, herpetological, avian, and mammalian systematists.

Eliot and Rose have done a fine job. Their volume can be heartily recommended. “ Adrian Johns, Technology and Culture From the early Sumerian clay tablet through to the emergence of the electronic text, this Companion provides a continuous and coherent account of the history of the book. A team of expert contributors draws on the latest research in order to offer a cogent, transcontinental narrative. Many of them use illustrative examples and case studies of well-known texts, conveying the excitement surrounding this rapidly

developing field. The Companion is organized around four distinct approaches to the history of the book. First, it introduces the variety of methods used by book historians and allied specialists, from the long-established discipline of bibliography to newer IT-based approaches. Next, it provides a broad chronological survey of the forms and content of texts. The third section situates the book in the context of text culture as a whole, while the final section addresses broader issues, such as literacy, copyright, and the future of the book. The Crimean War (1853-56) between Russia, Turkey, Britain, France and the Kingdom of Sardinia was a diplomatically preventable conflict for influence over an unstable Near and Middle East. It could have broken out in any decade between Napoleon and Wilhelm II; equally, it need never have occurred. In this masterly study, based on massive archival research, David Goldfrank argues that the European diplomatic roots of the war stretch far beyond the 'Eastern Question' itself, and shows how

the domestic concerns of the participants contributed to the outbreak of hostilities.

Rules of Origin in ASEAN is the first in-depth exploration of the complex rules of origin in ASEAN's trade agreements. Written by two leading practitioners, it explains with clarity the existing ASEAN Rules of Origin (RoO) practices and their administration regimes in a comparative context and provide a recommendation for reform. The ASEAN RoOs can be simplified by imparting transparency and predictability to the legal drafting, focusing on a calculation method based on value of materials and lowering the regional value content required to qualify as ASEAN origin. The administration of ASEAN RoOs can be improved by expanding the use of self-certification, moving away from document-based verification to more modern post-entry audit

and trade facilitation approaches. This is a timely and important topic which will be insightful to practitioners, policymakers and businesses in understanding how commerce and trade are conducted in Southeast Asia.
