Revisit the romantic age of aeronautics when the rapid development of balloons, dirigibles and airplanes changed the world forever. Archibald Williams wrote this entertaining and informative journey through the early days of air travel for readers of all ages in 1926, covering the earliest ascents in balloons through the Wright Brothers, trans-Atlantic flights. The special edition enlarged reprinting

includes: - Enlarged 7" x 10" pages - Crisp digitally re-scanned and enhanced images - Bold new cover design - Author's original page layouts - Classic type font - English printing with illustration captions Chapter by chapter Williams chronicles the feats and failures of those legendary pioneers of flight with enthusiasm and an eye towards the future, where he envisions a time when a "machine will be able to alight vertically in a space no larger than the back garden of a small suburban villa, or

---

on a flat roof." Enjoy an informative look at the earliest ascents of balloons, dirigibles, and the first crossings that made history. The rapid development of the mechanical airplane is covered with great interest, as is its application in commercial air travel, exploration, and warfare. For readers looking to enjoy a broad, illustrated overview of airplanes and the history of air travel, *Conquering the Air* is a delight to read. "We shall devote our attention first to the origin of the spherical balloons and to the most notable voyages made in them. Next, we shall see how the balloon was altered in form, provided with motive power of its own, and converted from a mere gas-container and a self-directing aerial ship. Then follows an account of the experiments which led to the production of the first practical flying machine; to be succeeded by a series of chapters devoted to those fights, of successively increasing length, which, as first exemplifying the conquest of the air the grand

To most doctors, brachial and  
lumbosacral plexopathies are known  
as difficult disorders, because of  
their complicated anatomy and

---

relatively rare occurrence. Both the brachial, lumbar, and sacral plexuses are extensive PNS structures stretching from the neck to axillary region and running in the paraspinal lumbar and pelvic region, containing 100000 – 200000 axons with 12 – 15 major terminal branches supplying almost 50 muscles in each limb. The most difficult part in diagnosing a plexopathy is probably that it requires an adequate amount of clinical suspicion combined with a thorough anatomical knowledge of the PNS and a meticulous clinical examination. Once a set of symptoms is recognized as a plexopathy the patients' history and course of the disorder will often greatly limit the differential diagnosis. The most common cause of brachial plexopathy is probably neuralgic amyotrophy and the most common cause of lumbosacral plexopathy is diabetic amyotrophy. Traumatic and malignant lesions are fortunately rarer but just as devastating. This chapter provides an overview of both common and rarer brachial and lumbosacral plexus disorders, focusing on clinical examination, the use of additional investigative techniques, prognosis, and treatment.

"The Frontline presents a selection of essays drawn together for the first time to form a companion volume to Serhii Plokyh ' s The Gates of Europe and Chernobyl. Here he expands upon his analysis in earlier works of key events in Ukrainian history, including Ukraine ' s complex relations with Russia and the West, the burden of tragedies such as the Holodomor and World War II, the impact of the Chernobyl nuclear disaster, and Ukraine ' s contribution to the collapse of the Soviet Union. Juxtaposing Ukraine ' s history to the contemporary politics of memory, this volume provides a multidimensional image of a country that continues to make headlines around the world. Eloquent in style and comprehensive in approach, the essays collected here reveal the roots of the ongoing political, cultural, and military conflict in Ukraine, the largest country in Europe."

end game at Yorktown and the Treaty of Paris. There is a discussion of African-Americans, American Indians, privateers, and the role of religion in the Revolutionary Period. There are biographies of General George Washington, Nathanael Greene, Salem Poor, Captain John Paul Jones, John Adams, Haym Salomon, and Thomas Paine. The second chapter gives a good overview of the major battles of the revolution. Chapter Three provides a very thorough day-by-day overview through 1783. The next chapter is an essay about the continental army's ways of war. Chapter Five discusses the factors contributing to the success of the American colonies as they revolted against British rule. The following chapter by the U.S. Army is a detailed account of the Army in the forging of a nation, beginning with the European heritage of the colonies. A major section provides a timeline of the revolution with numerous original document transcriptions, placing each text in the context of its history. It gives extraordinary contemporaneous insight into the thoughts and plans of key players in the drama, including Washington. Supplying Washington's Army is the next section of this incredible encyclopedia, answering the question of how the soldiers were clothed and armed and why there was such a shortage of provisions. The role of the first American Navy, and Captain John Paul Jones, is covered in the next chapter, which includes a full list of vessels of the Continental Navy. The history of the U.S. Army noncommissioned officer (NCO), dating back to 1775 with the birth of the Continental Army, is discussed in the next chapter. There are four chapters on intelligence, including the role of Army rangers and Thomas Knowlton. A brief chapter describes the musket drill. Army-supplied histories of four major battles provide vivid accounts: Camden, King's Mountain,

Philadelphia, and the Virginia Campaign.

A Synopsis of the Bura Project The three major rationale for writing this book are primarily to: through the study of African language family groups trace the origin of the tribe to a more specific location rather than the diffused response of 'from the East?'; secondly to investigate why and how the word 'Pabir/Babur' came on the scene referring to a separate ethnic group different or the same as the Bura and thirdly to document some of the vanishing Bura cultural practices and deeds. For example what their beliefs

are, their marriage practices, local industries and what they do to pass time. It is my strong belief that the first objective is accomplished through our analysis and presentation of the Proto-Afro-asiatic linguistic family classification group and its subgroup the Proto-Chadic of which the Biu-Mandara forms a sub-branch. Through a systemic and vigorous study of the classification of the different languages comprising this Proto Family of languages and its sub-branches we are able to assert that the Bura people were among many other ethnic groups part of a group whose origin can be traced to the Levant region of south west Asia and the Middle-East. They belong to the group that forms

---

?back to Africa migration?. This is because modern genetic studies of languages indicate that they're the only group that have traces of Y chromosome belonging to haplogroup R1b R-V88 in Africa but found mainly in Asia and Europe. After tracing the influences of the powerful Kanem (ca. 700-1376) and later Bornu-Kanem (1380-1893) empires around the Lake Chad region as well as the kingdom of Mandara (founded in about 1459, i.e. end of the 15th century), in what is today modern Cameroon on the inhabitants of the region, we conclude a chaotic period of migrations and wars, including trade in slaves. It is through this prism that we notice the emergence of the founder of

the Woviri dynasty of Biu. Through his failure to win the Maiship of Bornu, he moved to Mandara and then the Plateau of Biu with some of his followers or relatives. Being a student of History Abdulahi or who later became Yamta-ra-wala attempted to replicate what the Kanembu were able to do among the local people they conquered some centuries earlier; they created an ethnicity and language called Kanuri. Yamta-ra-wala succeeded somewhat, but wasn't able to completely conquer the Bura people and turn them in his new ethnic vision. Instead the Buras went to the hills to fight him the next day. The new breed he created he called ?Pabir? or Babur as the Hausa

---

would call them. The myth of who Yamta-ra-wala is has for the present eclipsed historians and would probably continue for some time to come. As for the Bura (Most have down the hill-tops and mountains!) and the Pabir they have never been closer than today. Today for all practical purposes they are one and the same ethnic group, they've intermingled more than any two previously separated groups. Their vocabulary, phonology and cultural practices have fused into one in most instances.

the effectiveness of today's decisions and the quality of planning for the future. History is therefore important to the Air Force; the recorded past is a foundation for doctrine, policy, strategy, tactics, equipment development, organization, force structure, and virtually every other element of air power. This volume, published in commemoration of the fiftieth anniversary of the Air Force as an independent service, is especially valuable. Not only should it both inspire and enlighten the members of the Air Force, it should also serve as a convenient source of information for those outside the service who are interested in the origin, growth, evolution and application of American air power.

Throughout its first century, military aviation helped advance the interests of the United States. From a curiosity, fragile and of uncertain value, the warplane has become a devastating weapon. Moreover, ballistic missiles and surveillance satellites have joined aircraft in this aerial array. In these volumes, we try to describe and analyze, in the context of national policy and international rivalries, the evolution of land-based air power since the United States Army in 1907 established an Aeronautical Division responsible to the Chief Signal Officer. This work, in addition to commemorating the Air Force's fiftieth anniversary, also commemorates almost one hundred

years of progress in the design and use of aerial weaponry. By placing airmen and their machines in an appropriate context, it provides a clearer understanding of the central role of the Air Force in current American defense policy. Early in the conceptualization of this work, we decided that a collaborative effort would make the best use of whatever special skills or knowledge each of us might possess. We knew, however, that successful collaboration requires a plan, and the blueprint was the work of Warren A. Trest, then the chief of the Histories Division, Office of Air Force History. He devised a basic outline for the book, and after his transfer elsewhere in the Air Force history program, Bernard C. Nalty saw the design through to its completion. Under the general guidance of these two, we wrote, reviewed, and revised each chapter. A panel of historians and military officers reviewed the manuscript, which then underwent the final revisions that these distinguished individuals suggested.

A Survey of New Testament History provides a broad, chronological overview of the events mentioned in the New Testament. It shows how the various incidents recorded in the Gospels and the book of Acts fit into God's overall plan to redeem mankind. The first chapter explores how God prepared the world for Christ's coming. Chapters 2 through 7 are a synopsis of the life, ministry and teaching of Christ. Chapters 8 through 17 are an overview of the history of the early church, the issues it faced, and the incredible growth and progress it made. They also include a brief synopsis of each of the 27 books of the New Testament. Chapter 18 provides an overview of the 4 major schools of interpretation of the book of Revelation plus a brief discussion of its meaning. A special appendix compares and contrasts the book of Revelation to the book of Genesis. The volume also contains 10 maps.

The 18 chapters in this survey emphasize practical lessons and applications which are relevant to us today. Our world shares several similarities to the world into which Christ was born. An understanding of His world can give us a fresh look at our own. The church today faces many of the same stresses and challenges as the early church. Looking at how the first believers overcame their struggles and questions can encourage and inspire us. A Survey of New Testament History is suitable for use in groups as well as by individuals. Each of the studies has been tested in the classroom.
