Leviathan or The Matter, Forme and Power of a Common-Wealth Ecclesiastical and Civil is a book written by an English materialist philosopher Thomas Hobbes

about problems of the state existence and development. Leviathan is a name of a Bible monster, a symbol of nature powers that belittles a man. Hobbes uses this character to describe a powerful state (“ God of the death ”). He starts with a postulate about a natural human state (“ the war of all against all ”) and develops the idea “ man is a wolf to a man ” . When people stay for a long time in the position of an inevitable extermination they give a part of their natural rights, for the sake of their lives and general peace, according to an unspoken agreement to someone who is obliged to maintain a free usage of the rest of their rights – to the state. The state, a union of people, where the will of a single one (the state) is compulsory for everybody, has a task to regulate the relations between all the people. The book was banned several times in England and Russia.

Course Objectives: Students completing this course will Explore the history of the ChurchLearn about the lives of courageous missionaries around the worldUnderstand the importance of spreading the GospelStudy current global missions needsAcquire geographical knowledge Vocabulary Study: Having a good vocabulary is essential for students to be effective communicators, thinkers, and readers. It is a skill that is applicable to any academic discipline, including history. Students should be encouraged to look up words that they do not know when they encounter them while reading. Students will not do formal vocabulary activities in this course, but a glossary has been provided for words that the students may find difficult or unfamiliar in the assigned reading. Upon encountering an unknown word, the student should consult the glossary provided at the back of the teacher guide and/or a dictionary. Students should also be aware that many of these words have multiple meanings. It is important that students learn to use the context of these words in the text to help understand their meanings. Students are encouraged to maintain a list of these words and review them periodically throughout the course. Review could include writing the words and their definitions on index cards to use as flashcards, having students create their own dictionaries, or using the words in sentences. This component of the course is entirely optional, however, and not built into the schedule. Using Vintage Books: One of the books included in this course, Adventures in Missionary Heroism, was originally published in the early 1900s. There is real value in reading vintage books like this one. These historical texts not only provide us with information but also insight into the attitudes and perceptions of people from that time. It is important to remember that vintage books can express attitudes and use terminology that is no longer considered appropriate. When students come across these moments in vintage books, it is the perfect opportunity for them to have a discussion with their teacher about this material. Teachers and students can use this opportunity to analyze the differences in attitudes between now and then, as well as to review Biblical principles regarding issues like racism. These conversations will provide students a context for understanding the attitudes expressed in the text, as well as help them develop their own skills of discernment and critical thinking when it comes to materials they are reading.

As her parents make the dangerous trek across the Mexican border to “ El Otro Lado ” (The Other Side) in pursuit of the American dream, Reyna and her siblings are forced into the already overburdened household of their stern grandmother. When their mother at last returns, Reyna prepares for her own journey to “ El Otro Lado ” to live with the man who has haunted her imagination for years, her long-absent father. Are all film stars linked to Kevin Bacon? Why do the stock markets rise and fall sharply on the strength of a vague rumour? How does gossip spread so quickly? Are we all related through six degrees of separation? There is a growing awareness of the complex networks that pervade modern society. We see them in the rapid growth of the Internet, the ease of global communication, the swift spread of news and information, and in the way epidemics and financial crises develop with startling speed and intensity. This introductory book on the new science of networks takes an interdisciplinary approach, using economics, sociology, computing, information science and applied mathematics to address fundamental questions about the links that connect us, and the ways that our decisions can have consequences for others.
