This book develops an original version of act-consequentialism.

It argues that act-consequentialists should adopt a subjective criterion of rightness. The book develops new arguments which

strongly suggest that, according to the best version of act-consequentialism, the rightness of actions depends on expected rather than actual value. Its findings go beyond the debate about consequentialism and touch on important debates in normative ethics and metaethics. The distinction between

criterion of rightness and decision procedures addresses how, why, and in which sense moral theories must be implemented by ordinary persons. The discussion of the rationales of "ought" implies "can" leads to the discovery of a hitherto overlooked moral principle, "ought" implies "evidence", which can be used to show

that most prominent moral theories are false. Finally, in the context of discussing cases that are supposed to reveal intuitions that favour either objective or subjective consequentialism, the book argues that which cases are relevant for the discussion of objectivism and subjectivism

depends on the type of moral theory we are concerned with (consequentialism, Kantianism, virtue ethics, etc.). From Value to Rightness will be of interest to scholars and advanced students working in normative ethics and metaethics. Essential reading for Catholics of all walks of life. Here it is - the first new Catechism of the Catholic Church in more than 400 years, a complete summary of what Catholics around the world commonly believe. The Catechism draws on the Bible, the Mass, the Sacraments, Church tradition and teaching, and the lives of saints. It comes with a complete index, footnotes and cross-references for a fuller understanding of every subject. The word catechism means "instruction" - this book will

serve as the standard for all future catechisms. Using the tradition of explaining what the Church believes (the Creed), what she celebrates (the Sacraments), what she lives (the Commandments), and what she prays (the Lord's Prayer), the Catechism of the Catholic Church offers challenges for believers and answers for all those interested in learning about the mystery of the Catholic faith. The Catechism of the Catholic Church is a positive, coherent and contemporary map for our spiritual journey toward transformation.

The publication of this third edition of the definitive text on clinical forensic medicine comes at an exciting time for a subject now gaining recognition as a speciality in the medical establishment.

This growing acknowledgement reflects the fact that increasing numbers of health professionals are becoming engaged in general forensic services. Nurses and paramedics are more involved than ever in custody care, while nurses themselves are conducting more examinations in cases involving alleged sexual offences. Thus it is vital that those caring for this vulnerable group of patients (whether detainees or complainants) have the tools to master this specialist set of skills. All the chapters in this new edition have been fully updated, with some undergoing extensive revision. Recent developments in child protection protocols have prompted a major rewrite of the chapter on non-accidental injury, and the text now includes a specific chapter on the use of the TASER. Other aspects of restraint are now dealt with separately. The material on care of detainees and fitness for interview has been split into individual chapters to allow a more comprehensive discussion of the issues. In addition, new authors have joined the team of contributors, facilitating a wider range of international perspectives. From its chapters on the history and core principles of clinical forensic medicine, right up to the text's discussion of substance misuse and deaths in custody, this volume remains the gold standard source for health professionals whose working lives bring them into contact with those in the law

enforcement arena.

"This research and development effort, called Combined Arms Operations at Brigade Level, Realistically Achieved Through Simulation III (COBRAS III), designed simulation -based, structured training for the staffs of the conventionally-equipped brigade combat team (BCT).

The effort included designing a progressive approach to presenting and utilizing training objectives. The resulting product was a set of "performance objectives" that provides techniques and procedures for command and staff performance. The performance objectives resulted from and support the purpose of the training, which is to facilitate BCT preparation for combat training center rotations and deployment. The performance objective concept was an extension of

the task analysis work conducted during the two proceedings projects. -- COBRAS I and COBRAS II."--DTIC.

Understanding Special Educational Needs John Wiley & Sons

Teachers need to be fully equipped to respond to diversity in today's classrooms now more than ever before. The Professional Standards for Qualified Teacher Status and Induction Standards are now the driving force behind initial teacher education, and students will need to demonstrate their competence against these, and in particular, their understanding of

Special Educational Needs in today's inclusive classrooms. Each chapter of this indispensable text explores an important topic within SEN and directly relates it to the competencies, making it an essential course companion. Chapters on topics relating to the code of practice, school policy, literacy and numeracy, ICT, emotional and behavioural difficulties and dealing with parents all follow a similar template, which includes: a commentary on the relevant professional standards contextualising of the standards what teachers can do to promote effective practice. Detailed referencing will lead students to pursue more detailed individual

texts, which address many of the issues in greater depth. This is an ideal, highly accessible text for student and new qualified teachers who need a reliable introduction to today's vital issues within Special Educational Needs. NCLEX-PN Content Review Guide Springer Science & Business Media
