University of Michigan Press "Employment Relations" is widely taught in business schools around the world. Increasingly however more emphasis is being placed on the

comparative and international dimensions of the relations between employers and workers. It is becoming ever more important to comprehend today's work and employment issues alongside a knowledge of the dynamics between global financial and product markets, global production chains, national and

international employment actors and institutions and the ways in which these relationships play out in different national contexts. This textbook is the first to present a cross-section of country studies, including all four BRIC countries, Brazil, Russia, India and China alongside integrative

 This revised and updated edition of
 a core textbook — one of the most
 well-established texts in the field of
 comparative politics — offers a

comprehensive introduction to the
 comparison of governments and
 political systems, helping students
 to understand not just the
 institutions and political cultures of
 their own countries but also those
 of a wide range of democracies and
 authoritarian regimes from around
 the world. The book opens with an
 overview of key theories and
 methods for studying comparative
 politics and moves on to a study of
 major institutions and themes, such
 as the state, constitutions and
 courts, elections, voters, interest
 groups and political economy. In
 addition, two common threads run
 throughout the chapters in this
 edition — the reversal of
 democracy and declining trust in
 government — ensuring that the

book fully accounts for the rapid developments in politics that have taken place across the world in recent times. Written by a team of experienced textbook authors and featuring a range of engaging learning features, this book is an essential text for undergraduate and postgraduate courses on Comparative Politics, Comparative Government, Introduction to Politics and Introduction to Political Science. Comparative Anatomy and Histology Author House COVID-19 is the most significant global crisis of any of our lifetimes. The numbers have been stupefying, whether of infection and mortality, the scale

of public health measures, or the economic consequences of shutdown. Coronavirus Politics identifies key threads in the global comparative discussion that continue to shed light on COVID-19 and shape debates about what it means for scholarship in health and comparative politics. Editors Scott L. Greer, Elizabeth J. King, Elize Massard da Fonseca, and Andr   Peralta-Santos bring together over 30 authors versed in politics and the health issues in order to understand the health policy decisions, the public health interventions, the social policy decisions, their

interactions, and the reasons. The book 's coverage is global, with a wide range of key and exemplary countries, and contains a mixture of comparative, thematic, and templated country studies. All go beyond reporting and monitoring to develop explanations that draw on the authors' expertise while engaging in structured conversations across the book. Model Rules of Professional Conduct W.W. Norton & Company This book elaborates on the rules governing the prosecution and sentencing of multi-

offenders. The term ‘ multi-offender ’ is used for an offender that has committed a series of offences (either in one single act or in different acts); hence the addition of ‘ multi ’ in ‘ multi-offender ’. A crucial element thereto is that the whole series of offences — which make the offender a multi-offender — has been committed before being subject to a final conviction. A comparative EU-study was conducted, focussing on the rules governing multi-offenders within different EU Member States. It reveals that this type of offenders challenge both the legislator and the prosecution

and judges: when the offences are prosecuted in one go, the challenges are linked to finding an appropriate way to assess the severity of the criminal behaviour; if however the offences are prosecuted in several simultaneous or consecutive proceedings, the challenges are linked to taking account of the simultaneous or past proceeding. These challenges only grow if proceedings take place in different EU Member States. The analysis presented in this book is essential reading for EU policy makers, national policy makers, academics and defence lawyers throughout the EU working with

multi-offenders. Undoubtedly, it will be an asset to their work in both mere national as well as in cross-border cases.
