Section 23.1: Genetic variation makes evolution possible 1.

We tend to focus on genetic mutations that create phenotypic changes.

Phenotypic = Observable physical and physiological traits of an organism, which are determined by its genetic

makeup - Product of an inherited genotype and many environmental influences 2.

Chapter 23 The Evolution of
Populations Lecture Outline .
Overview: The Smallest Unit of
Evolution. One common
misconception about evolution
is that organisms evolve, in a
Darwinian sense, during their
lifetimes. Natural selection does
act on individuals.

Chapter 23: The Evolution of
Populations This chapter
begins with the idea that we
focused on as we closed the
last chapter: Individuals do
not evolve! Populations
evolve. The Overview looks at
the work of Peter and
Rosemary Grant with
Gal á pagos finches to
illustrate this point, and the
rest of the chapter examines
the change in populations
over time. As in the last
