Chapter 23 - The Evolution of Populations | CourseNotes

Chapter 23: The Evolution of Populations This chapter begins with the idea that we focused on as we closed the last chapter: Individuals do not evolve! Populations evolve. The Overview looks at the work of Peter and Rosemary Grant with Gal á pagos finches to illustrate this point, and the rest of the chapter examines the change in populations over time. As in the last *Chapter 23 - The Evolution of Populations - Chapter 23 The ...*

Chapter 23: The Evolution of Populations

Section 23.1: Genetic variation makes evolution possible 1. We tend to focus on genetic mutations that create phenotypic changes. Phenotypic = Observable physical and physiological traits of an organism, which are determined by its genetic makeup - Product of an inherited genotype and many environmental influences 2.
