Okonkwo is the greatest warrior alive, famous throughout West Africa. But when he accidentally kills a clansman, things begin to fall apart. Then Okonkwo returns from exile to find missionaries and colonial governors have arrived in the village. With his world thrown radically off-balance he can only hurtle towards tragedy. Chinua Achebe's stark novel reshaped both African and world literature. This arresting parable of a proud but powerless man witnessing the ruin of his people begins Achebe's landmark trilogy of works chronicling the fate of one African community, continued in Arrow of God and No Longer at Ease.

The proper functioning of the EU financial market is protected by public actors - both national and supranational - responsible for rulemaking and supervision of investment firms and other private actors. At the same time the effectiveness of the EU legal system requires vigilance from private actors such as investment firms but also their clients, invoking their rights before national authorities and

courts. This means that investment firms have a dual role within the system, turning them into subjects of control and enforcement but also agents in the maintenance of the rule of law. Legal Accountability in EU Markets for Financial Instruments brings together a group of scholars with expertise from different legal disciplines but a shared interest for the EU internal market and the way it develops. It integrates a modern study of the form and function of EU rulemaking in the internal market after the financial crisis. The book includes an evaluation of core aspects of rulemaking in the financial market and that way provides a cross-cutting treatment of EU law. The focus of the book is set on the regulatory framework in MiFIDII and MiFIR and thematic questions around legal mechanisms for accountability and the role of investment firms in the operation of those mechanisms. It further discusses the implications for EU law and the EU legal system and gives readers a thorough understanding of the concept of accountability through its own findings.

The orientalists have been studying the seerah of the prophet with a view to casting doubt and raising suspicions and discrediting the life and personality of the Prophet (saw). Their approach has evolved over the period of time. At times they have been vicious in their attacks as was the case in the 18th century which with time during the 19th and 20th century became seemingly sympathetic to his life. This study by Dr Muhammad Mohar Ali critically analyses the works of three famous orientalists, William Muir, D.S Margoliouth and W. Montgomery Watt. Dr Ali refutes the charges levelled by them against the life and character of the Prophet (saw) with an erudition which the treatment of such a subject requires. Fourier analysis is one of the most useful and widely employed sets of tools for the engineer, the scientist, and the applied mathematician. As such, students and practitioners in these disciplines need a practical and mathematically solid introduction to its principles. They need straightforward verifications of its results and formulas, and they need clear indications of the limitations of those results and formulas. Principles of Fourier Analysis furnishes all this and more. It provides a comprehensive overview of the mathematical theory of Fourier analysis, including the development of Fourier series, "classical" Fourier transforms, generalized Fourier transforms and analysis, and the discrete theory. Much of the author's development is strikingly different from typical presentations. His approach to defining the classical Fourier transform results in a much cleaner, more coherent theory that leads naturally to a starting point for the generalized theory. He also introduces a new generalized theory based on the use of Gaussian test functions that yields an even more general -yet simpler -theory than usually presented. Principles of Fourier Analysis stimulates the appreciation and understanding of the fundamental concepts and serves both beginning students who have seen little or no Fourier analysis as well as the more advanced students who need a deeper understanding. Insightful, non-rigorous derivations motivate much of the material, and thought-provoking examples illustrate what can go wrong when formulas are misused. With clear, engaging exposition, readers develop the ability to

intelligently handle the more sophisticated mathematics that Fourier analysis ultimately requires.

In a neo-liberal era concerned with discourses of responsible individualism and the 'selfie', there is an increased interest in personal lives and experiences. In contemporary life, the personal is understood to be political and these ideas cut across both the social sciences and humanities. This handbook is specifically concerned with auto/biography, which sits within the field of narrative, complementing biographical and life history research. Some of the contributors emphasise the place of narrative in the construction of auto/biography, whilst others disrupt the perceived boundaries between the individual and the social, the self and the other. The collection has nine sections: creativity and collaboration; families and relationships; epistolary lives; geography; madness; prison lives; professional lives; 'race'; and social justice and disability. They illustrate the inter- and multi-disciplinary nature of auto/biography as a field. Each section features an introduction from a section editor, many of whom are established researchers and/or members of the British Sociological Association (BSA) Auto/Biography study group. The handbook provides the reader with cutting-edge research from authors at different stages in their careers, and will appeal to those with an interest in auto/biography, auto-ethnography, epistolary traditions, lived experiences, narrative analysis, the arts, education, politics, philosophy, history, personal life, reflexivity, research in practice and the sociology of the everyday. The relationship between the sequence of the

creation cycle and the Egyptian 28 ABGD alphabet. This book focus on the relationship between the sequence of the creation cycle and the Egyptian ABGD alphabets; the principles and principals of Creation; the cosmic manifestation of The Egyptian Alphabets ; the three Primary Phases of the Creation Cycle and their numerical values; the creation theme of each of the three primary phases, as well as an individual analysis of each of the 28 ABGD alphabetical letters that covers each' s role in the Creation Cycle, its sequence significance ,its sound and writing form significance, its numerical significance, its names & meanings thereof, as well as its peculiar properties and nature/impact/influence. This book is divided into five parts containing a total of 35 chapters. Part I. Egyptian Alphabetical Letters of Creation Cycle has four chapters: Chapter 1: Historical Deception of the (Ancient) Egyptian Linguistics will clear the intended confusion to hide the alphabetical form of writing in Ancient Egypt—as being the archetype of all languages throughout the world. Chapter 2: The Principles and Principals of Creation covers the basic components of the creation cycle in the Ancient Egyptian accounts. Chapter 3: The Cosmic Manifestation of the Egyptian Alphabets covers the natural orderly progression of the emanated divine energy, and the its manifestation in the monthly lunar mansion changes; the correlations between the sequence of the ABGD letters and their numerical values. Chapter 4: The Three Primary Phases of the Creation Cycle covers the nature of the creation cycle consisting of three phases, as found in the Ancient Egyptian accounts and later on duplicated in Sufi (and other) writings. Part II. The Conceiving Phase/Ennead has ten chapters—5 through 14: Chapter 5: The Theme of the First Phase/Ennead covers the theme of the First Phase/Ennead (1-9 'A' -'T.') as the objectification of a circumscribed area of undifferentiated energy/matter, wherein the world will be manifested. It consists of the

establishment of order and the co-factors of life-forms as the foundation for the world. Phase One consists basically of three consecutive groups. Each of which consists of 3 stages/letters/numbers. Chapters 6 through 14 cover the first nine letters—each covering its role in the Creation Cycle, its sequence significance, its sound and writing form significance, its numerical significance, its names and meanings thereof, as well as its peculiar properties and nature/impact/influence. Part III. The Orderly Manifestation Phase/Ennead has ten chapters—15 through 24: Chapter 15: The Theme of the Second Phase/Ennead covers the theme of the Second Phase/Ennead, the orderly manifestation of creation. This Second Phase deals with the creation of the noumenal and phenomenal planes—the two grand subdivisions of the manifested world. The letters of this Phase are therefore arranged in two groups of four letters and the middle letter 'N' overlaps the two planes: 'Y', 'K', 'L', 'M' 'N' 'S', 'A.' , 'F', 'S.' Chapters 16 through 24 cover the second nine letters—each covering same topics as in the prior group of nine letters. Part IV. The Reunification Phase/Ennead has ten chapters—25 through 34: Chapter 25 covers the theme of the Third Phase/Ennead which is the Ascending and Reunification Phase that leads to a NEW Alpha—Heru-Akhti of The Two Horizons. Chapters 26 through 34 cover the third nine letters—each covering same topics as in the other two groups of nine letters. Part V being chapter 35 covers the 28th Mansion/Letter 'Gh'—representing The New Alpha. Congressional Serial Set Dar UL Thaqafah International Relations, Meaning and Mimesis is an innovative assessment of the uses of theory in making sense of international politics, opening up new pathways to thinking about the basics of the study area. Insights drawn from an interdisciplinary corpus of critical scholarship are synthesized and brought to bear on key concepts such as sovereignty, the state, peace, law, justice, ethics, and supranationality. The mainstream characteristically dismisses the narrativity that accompanies these concepts as derivative, tending to treat meaning attributable to them as static. The work shows how problematic this disdain of mimesis (exchange, reproduction, imitation) is and how this mindset effectively incapacitates conventional theorizing in both predicting phenomena and providing a normative vision. Integrating the study of international politics into

debates in the wider academia over meaning and mimesis, this ambitious work is fluent and accessible at the same time, with exceptional lucidity in presenting difficult philosophical notions. A series of radical positions advanced in the book on theory and methodology not only address and call to account the mainstream imagination on international politics but also outline the implications of this critique for a host of specific issue areas, including peace research, normative theories, international law, and European studies.
