*737-600/700/800/900*

The Boeing 737 is a twin jet narrow-body airliner built by Boeing. At first, Boeing was making it to be a shorter, cheaper airliner than its 707 and

727. However, the 737 has become a family of nine different models. The number of passengers it can carry ranges from 85 to 215.

*FOR REFERENCE ONLY / All individual ATA chapters listed ...*

Boeing has made significant progress over the past several months in support of safely returning the 737 MAX to service as the company continues to work with the FAA and other global

regulators on the process laid out for certifying the 737 MAX software and related training updates.

*Chapter 28 Boeing  
737*  
The Boeing 737 is  
the slowest  
commercial aircraft  
in the skies,  
creating a painful  
5 1/2 to 6 hour  
flight, 30 minutes  
longer than flying  
on a widebody like  
Hawaiian's Boeing  
767. United isn't  
alone- Alaska,

American, Southwest  
and Delta all  
conspire to wedge  
passengers into  
these slow slugs on  
too lengthy of  
segments.
