Heath: My relationships are nothing more than casual dating with booty-calls. A one-hour stand before my mother's wedding reception? Perfect.

Georgia: I may have been born a romantic, but I've grown jaded about love. Being practically disowned by one's father will do that to a girl. Now all I want is solitude and the occasional anonymous pick-up. Occasional?

Okay, so I haven't managed that yet. Daddy Dearest's wedding seems like a great place to start. Chief of Perversion is a standalone love story with a hard earned HEA.

Microbial Life in the Cryosphere and Its Feedback on Global Change Springer Nature
This popular text, now in its fourth edition, “unpacks” the various dimensions of literacy—linguistic and other sign systems; cognitive; sociocultural; and developmental—and at the same time accounts for the interrelationships among them. Distinguished by its examination of literacy from a multidimensional and interdisciplinary perspective, it provides a strong conceptual foundation upon which literacy curriculum and instruction in school

settings can be grounded. Linking theory and research to practice in an understandable, user-friendly manner, the text provides in-depth coverage of the dimensions of literacy, includes demonstrations and “hands-on” activities, examines authentic reading and writing events that reflect key concepts, and summarizes the concepts in tables and figures. Changes in the Fourth Edition • Addresses academic language, new literacies/multiliteracies, and their relationship to literacy learning • More fully develops the developmental dimension of literacy in separate chapters on adult mediation and learner construction • Expands the discussion of multimodal literacies • Extends and integrates the discussion of bilingualism and biliteracy throughout the text • Integrates instructional

implications more fully throughout

One Gold Heart When reclusive oboist, Mac Wallis agrees to replace an injured friend for the Christmas concert season, she gets more than she bargained for when she meets Dom, Finn Taylor and has to decide whether to take a chance or return to her life of seclusion. **One Gold Knot** After years of avoiding her teenage crush, Hildy Klein is shocked to come face to face with Wilson Kennedy. Her uncle's wake isn't the place to unravel all the ways that Wilson could leave her emotionally vulnerable and exposed, yet his gentle persistence is impossible to ignore. But Wilson is no longer that boy in her fantasies, and now Hildy must

decide if she will give up control and commit to the protective, kinky Dom he's become. **One Gold Triquetra** A decade ago, a bad play-date turned composer Ella Hudson off BDSM. Now she's been offered a performance opportunity too good to pass up, but it means working closely with Jackson and Griffin--world class musicians, lovers, and Doms intent on adding her to their relationship. While Ella struggles to deny her true desires, maintaining her vanilla facade becomes increasingly difficult as the men re-introduce her to a world she'd written off.

Alasdair: She 's not for me. While a piece of me wants to wrap her in my arms and keep her safe, I know myself. My dark sexual appetite, my feral underbelly. If she gets too close, she'll discover a beast who will push her right to the very edge of sanity. **Katie:** After escaping a nightmare, I swore I 'd never let myself be vulnerable again. But then physical needs take over. In a world with well over three billion men, there has to be one for me. Not that it matters. No man wants another 's broken toys. **Agent of Denial** is a standalone love story with a hard earned HEA.

Celebrate the thirtieth anniversary of the Newbery Honor – winning survival novel Hatched with a pocket-sized edition perfect for travelers to take along on their own adventures. This special anniversary edition includes a new introduction and commentary by author Gary Paulsen, pen-and-ink illustrations by Drew Willis, and a water resistant cover. Hatched has also been nominated as one of America's best-loved novels by PBS's The Great American Read. Thirteen-

year-old Brian Robeson, haunted by his secret knowledge of his mother's infidelity, is traveling by single-engine plane to visit his father for the first time since the divorce. When the plane crashes, killing the pilot, the sole survivor is Brian. He is alone in the Canadian wilderness with nothing but his clothing, a tattered windbreaker, and the hatchet his mother had given him as a present. At first consumed by despair and self-pity, Brian slowly learns survival skills—how to make a shelter for himself, how to hunt and fish and forage for food, how to make a fire—and even finds the courage to start over from scratch when a tornado ravages his campsite. When Brian is finally rescued after fifty-four days in the wild, he emerges from his ordeal with new patience and maturity, and a greater understanding of himself and his parents.

A Monograph of Codonopsis and Allied Genera (Campanulaceae) Academic Press

Two-phase Flow Phenomena in Fuel Cell Microchannels A Monograph of Codonopsis and Allied Genera (Campanulaceae) Silicon and Nano-silicon in Environmental Stress Management and Crop Quality Improvement: Progress and Prospects provides a

comprehensive overview of the latest understanding of the physiological, biochemical and molecular basis of silicon- and nano-silicon-mediated environmental stress tolerance and crop quality improvements in plants. The book not only covers silicon-induced biotic and abiotic stress tolerance in crops but is also the first to include nano-silicon-mediated approaches to environmental stress tolerance in crops. As nanotechnology has emerged as a prominent tool for enhancing agricultural productivity, and with the production and applications of nanoparticles (NPs) greatly increasing in many industries, this book is a welcomed resource. Enables the development of strategies to enhance crop productivity and better utilize natural resources to ensure future food security

Focuses on silicon- and nano-silicon-mediated environmental stress tolerance Addresses the challenges of both biotic and abiotic stresses

A Power Broker Novel QTP

The world population is estimated to reach to more than 10 billion by the year 2050. These projections pose a challenging situation for the agricultural scientists to increase crops productivity to meet the growing food demands. The unavailability and/or inaccessibility to appropriate gene pools with desired traits

required to carry out genetic improvement of various crop species make this task formidable for the plant breeders. Incidentally, most of the desired genes reside in the wild genetic relatives of the crop species. Therefore, exploration and characterization of wild genetic resources of important crop species is vital for the efficient utilization of these gene pools for sustainable genetic improvements to assure food security. Further, understanding the myriad complexities of genic and genomic interactions among species, more particularly of wild relatives of crop species and/or phylogenetically distant germplasm, can provide the necessary inputs to increase the effectiveness of genetic improvement through traditional and/or genetic engineering methods. This book provides comprehensive and latest insights on the evolutionary genesis of diversity, access and its utilization in the evolution of various crop species. A comprehensive account of various crops, origin, exploitation of the primary, secondary and tertiary gene pools through breeding, biosystematical, cytogenetical and molecular phylogenetical relationships, and genetic enhancement through biotechnological interventions among others have been provided as the necessary underpinnings to consolidate information on the effective and

sustainable utilization of the related genetic resources. The book stresses upon the importance of wild germplasm exploration, characterization and exploitation in the assimilation of important crop species. The book is especially intended for students and scientists working on the genetic improvement of crop species. Plant Breeders, Geneticists, Taxonomists, Molecular Biologists and Plant Biotechnologists working on crop species are going to find this book very useful.
