Investigating the Scientific Evidence That Points Toward God Letts and Lonsdale

“ My road to atheism was paved by science... but, ironically, so was my later journey to God. ” Former atheist Lee Strobel has

discovered that science, far from being the enemy of faith, now provides a solid foundation for belief in God. New scientific discoveries point to the incredible complexity of our universe, a complexity best explained by the existence of a Creator. This revised six-session study (DVD/digital video) invites participants to encounter this evidence delivered in a compelling conversational style. Join Strobel in reexamining the theories that once led him away from God. Pastors, small group leaders, and individuals seeking resources that answer tough questions about the existence of God will find compelling answers in the Case for a Creator study. Sessions include: Science and God Doubts about Darwinism The Evidence of Cosmology The Fine-tuning of the Universe The Evidence of Biochemistry The DNA and the Origin of Life Designed for use with the Case for a Creator Revised Video Study 9780310699606 (sold separately).
