Since the early 1980s, when the federal courts began dismantling the landmark ruling in *Brown v. Board of Education*, segregation of black children has reverted to its highest level since 1968. In many inner-city schools, a stick-and-carrot method of behavioral control traditionally used in prisons is now used with students. Meanwhile, as high-stakes testing takes on pathological and punitive dimensions, liberal education has been increasingly replaced by culturally barren and robotic methods of instruction that would be rejected out of hand by schools that serve the mainstream of society. Filled with the passionate voices of children, principals, and teachers, and some of the most revered leaders in the black community, *The Shame of the Nation* pays tribute to those undefeated educators who persist against the odds, but directly challenges the chilling practices now being forced upon our urban systems. In their place, Kozol offers a humane, dramatic challenge to our nation to fulfill at last the promise made some 50 years ago to all our youngest citizens.

Richard De Veaux, Paul Velleman, and David Bock wrote *Stats: Data and Models* with the goal that students and instructors have as much fun reading it as they did writing it. Maintaining a conversational, humorous, and informal writing style, this new edition engages students from the first page. The authors focus on statistical thinking throughout the text and rely on technology for calculations. As a result, students can focus on developing their

conceptual understanding. Innovative Think/Show/Tell examples give students a problem-solving framework and, more importantly, a way to think through any statistics problem and present their results. Students, teachers and schools are under attack. The assault comes in the guise of 'accountability' and 'choice', cloaking itself in the 'scientifically-proven' with an over-emphasis of data. It combines a vilification of organized labor along with a promotion of the irrational, while readily blurring the line between utopia and dystopia. The attack abuses education as it disseminates self-serving propaganda, simultaneously covering up inconvenient truths like the United States government's long and storied relationships with Saddam Hussein and Osama bin Laden in the Wars on Terror. It suppresses solidarity and compassion while it champions a divisive form of selfish individualism. Engaged Pedagogy, Enraged Pedagogy seeks to counter these attacks and expose the ideological impulses behind them. Marshalling critical pedagogy and an ethic of care

with the notions of justified anger and the intellectual warrior, the book explores the non-antagonistic dualisms between faith and science, reason and emotion; it deconstructs social texts ranging from '80s action films to dystopian literature as it uncovers the ideologies that structure and order our lives; it explores and champions the democratic potential of dialogue, mutuality, and authority, while challenging left essentialism and identity politics. The book also features an interview with Joe Kincheloe, a seminal figure in the field of critical pedagogy.

NEW YORK TIMES BESTSELLER • From the governor-elect of Maryland, the "compassionate" (People), "startling" (Baltimore Sun), "moving" (Chicago Tribune) true story of two kids with the same name from the city: One went on to be a Rhodes Scholar, decorated combat veteran, White House Fellow, and business leader. The other is serving a life sentence in prison. Selected by Stephen Curry as his "Underrated" Book Club Pick with Literati The chilling truth is that his story could have been mine. The tragedy is that my story could have been his. In December 2000, the Baltimore Sun ran a small piece about Wes Moore, a local student who had just received a Rhodes Scholarship. The same paper also ran a series of articles about four young men who had allegedly killed a police officer in a spectacularly botched armed robbery. The police were still hunting for two of the suspects who had gone on the lam, a pair of brothers. One was named Wes Moore. Wes just couldn't shake off the unsettling coincidence, or the inkling that the two shared much more than space in the same newspaper. After following the story of the robbery, the manhunt, and the trial to its conclusion, he wrote a letter to the other

Wes, now a convicted murderer serving a life sentence without the possibility of parole. His letter tentatively asked the questions that had been haunting him: Who are you? How did this happen? That letter led to a correspondence and relationship that have lasted for several years. Over dozens of letters and prison visits, Wes discovered that the other Wes had had a life not unlike his own: Both had had difficult childhoods, both were fatherless; they'd hung out on similar corners with similar crews, and both had run into trouble with the police. At each stage of their young lives they had come across similar moments of decision, yet their choices would lead them to astonishingly different destinies. Told in alternating dramatic narratives that take readers from heart-wrenching losses to moments of surprising redemption, *The Other Wes Moore* tells the story of a generation of boys trying to find their way in a hostile world.

The son of Sogolon, the hunchback princess, and Maghan, known as "the handsome", Sundiata grew up to fulfill the prophecies of the soothsayers that he would unite the twelve kingdoms of Mali into one of the most powerful empires ever known in Africa, which at its peak stretched right across the savanna belt from the shores of the Atlantic to the dusty walls of Timbuktu. Retold by generations of griots, the guardians of African culture, this oral tradition has been handed down from the thirteenth century and captures all the mystery and majesty of medieval African kingship. It is an epic tale, part history and part legend.

Improving Schools to Promote Learning is a concise and common-sense examination of all the moving parts that drive student learning. The book ties together the research, policies, and practices relative to the state, district, school, classroom, and family, and explains their effects on student learning. The author covers an array of topics, including technology, charter schools, turnaround initiatives, and instruction in specific subject areas. Herbert J. Walberg's book continues the work of previous publications from the Center on Innovation & Improvement (Handbook on

Restructuring and Substantial School Improvement and Handbook on the Statewide Systems of Support) that connect research to practice at various levels of the education system. The book is accessible to a wide audience, including educators, school board members, parents, and policy makers. Walberg includes action steps in every chapter, providing practical recommendations for improved student achievement. The author also offers select references for additional material on the best research and most effective practices.

A gorgeous graphic tour of the inner workings of skyscrapers—from the author of *The Works Indispensable* and unforgettable, *The Heights* is the ultimate guide to the way skyscrapers work—from the bases of their foundations to the peaks of their spires. With skyscrapers becoming essential elements of urban life, there has never been a greater need for understanding and embracing these complex structures. Using innovative illustrations to tackle the vast complexity of these buildings, *The Heights* explores with remarkable insight every aspect of designing, building, and maintaining a modern skyscraper, as well as the individuals who build and maintain these architectural cathedrals. In the process, *The Heights* provides a remarkable snapshot of urban life at the dawn of the twenty-first century.

Mark didn't ask to move to New Hampshire. Or to go to a hick school like Hardy Elementary. And he certainly didn't request Mr. Maxwell as his teacher. Mr. Maxwell doesn't like rich

kids, or slackers, or know-it-alls. And he's decided that Mark is all of those things. Now the whole school is headed out for a week of camping -- Hardy's famous Week in the Woods. At first it sounds dumb, but then Mark begins to open up to life in the country, and he decides it might be okay to learn something new. It might even be fun. But things go all wrong for Mark. The Week in the Woods is not what anyone planned. Especially not Mr. Maxwell. With his uncanny knack to reach right to the heart of kids, Andrew Clements asks -- and answers -- questions about first impressions, fairness, loyalty, and courage -- and exactly what it takes to spend a Week in the Woods.

Perils of Protection One World
Unrecognized in the United States and resisted in many wealthy, industrialized nations, children's rights to participation and self-determination are easily disregarded in the name of protection. In literature, the needs of children are often obscured by protectionist narratives, which redirect attention to parents by mythologizing the supposed innocence, victimization, and vulnerability of children rather than potential agency. In *Perils of Protection: Shipwrecks, Orphans, and Children's Rights*, author Susan Honeyman traces how the best of intentions to protect children can nonetheless hurt them when leaving them unprepared to act on their own behalf. Honeyman utilizes literary parallels and discursive analysis to highlight the unchecked protectionism that has left minors increasingly isolated in dwindling social units and vulnerable to multiple injustices made possible by eroded or unrecognized participatory rights. Each chapter centers on a perilous pattern in a different context: "women and children first" rescue hierarchies, geographic restriction, abandonment, censorship, and illness. Analysis from adventures real and fictionalized will offer the reader high jinx and heroism at sea, the rush of risk, finding new families, resisting censorship through discovering shared political identity, and breaking the pretenses of sentimentality.
