A tour-de-force by rising indy comics star Gene Yang, American Born Chinese tells the story of three apparently unrelated characters: Jin Wang, who moves to a new neighborhood with his family only to discover that he's the only Chinese-American student at his new school; the powerful Monkey King, subject of one of the oldest and greatest Chinese fables; and Chin-Kee, a personification of the ultimate negative Chinese stereotype, who is ruining his cousin Danny's life with his yearly visits. Their lives and stories come together with an unexpected twist in this action-packed modern fable. American Born Chinese is an amazing ride, all the way up to the astonishing climax. George Orwell's *Nineteen Eighty-Four* is unquestionably the most famous dystopian novel of all times. Written in the year of 1948, the author swapped the last two digits while describing a future totalitarian society where the minds, attitudes and actions of the subjects are thoroughly scrutinized by the "Thought Police", suspected dissidents tracked down and where the worship of the mythical party leader Big Brother is forced upon the masses. The low-ranking party member Winston Smith begins secretly to question the whole system and initiates a forbidden love affair with another party member.

This book is an introduction to the language and standard proof methods of mathematics. It is a bridge from the computational courses (such as calculus or differential equations) that students typically encounter in their first year of college to a more abstract outlook. It lays a foundation for more theoretical courses such as topology, analysis and abstract algebra. Although it may be more meaningful to the student who has had some calculus, there is really no prerequisite other than a measure of mathematical maturity.

A Wrinkle in Time is the winner of the 1963 Newbery Medal. It was a dark and stormy night—Meg Murry, her small brother Charles Wallace, and her mother had come down to the kitchen for a midnight snack when they were upset by the arrival of a most disturbing stranger. "Wild nights are my glory," the unearthly stranger told them. "I just got caught in a downdraft and blown off course. Let me sit down for a moment, and then I'll be on my way. Speaking of ways, by the way, there is such a thing as a tesseract." A tesseract (in case the reader doesn't know) is a wrinkle in time. To tell more would rob the reader of the enjoyment of Miss L'Engle's unusual book. A Wrinkle in Time, winner of the Newbery Medal in 1963, is the story of the adventures in space and time of Meg, Charles Wallace, and Calvin O'Keefe (athlete, student, and one of the most popular boys in high school). They are in search of Meg's father, a scientist who disappeared while engaged in secret work for the government on the tesseract problem.
