Accessible to students and flexible for instructors, COLLEGE ALGEBRA AND TRIGONOMETRY, Eight Edition, incorporates the dynamic link between concepts and applications to bring mathematics to life. By integrating interactive learning techniques, the Aufmann team helps students to better understand concepts, work independently, and obtain greater mathematical fluency. The text also includes technology features to accommodate courses that allow the option of using graphing calculators. The authors' proven Aufmann Interactive Method allows students to try a skill as it is presented in example form. This interaction between the examples and Try Exercises serves as a checkpoint to students as they read the textbook, do their homework, or study a section. In the eighth edition, Review Notes are featured more prominently throughout the text to help students recognize the key prerequisite skills needed to understand new concepts. Deformation Geometry for Materials Scientists presents the study of macroscopic geometry of deformation, particularly on crystalline solids. The book discusses a wide range of topics on the deformation of crystalline materials. The text discusses concepts on stress and strain on materials and tensile tests. Linear elastic and plastic deformations; and the macroscopic geometry mechanism of slip and deformation twinning are covered as well. Materials scientists, engineers, and students of materials science will find this book a great reference material.

Prealgebra and Introductory Algebra: An Applied Approach Simon and Schuster New Syllabus Additional Mathematics (NSAM) is a series of textbooks and workbooks designed to prepare students for the Singapore-Cambridge GCE O-level examination in Additional Mathematics. Together with the textbook, the workbook will provide students with ample practice to apply the various skills

and concepts learnt to solving problems in both examination and real-life situations. The workbook contains the following features: **REVISION NOTES** Revision Notes are found at the start of each chapter. They emphasise the important concepts and formulae in the chapter. **PRACTICE QUESTIONS** Practice Questions provide students with a wide range of questions for further practice. The questions are classified into three levels of difficulty. questions require students to use specific skills and concepts in the chapter directly to solve problems. questions require students to apply their skills and concepts to solve problems. questions require students to apply various skills and concepts, including the use of problem-solving skills, to solve problems. **Revision Exercise** The Revision Exercise is found after every few chapters to help students to recall and consolidate all the concepts learnt in these chapters. **Mid-Year Specimen Papers and End-of-Year Specimen Papers** The Mid-Year Specimen Papers and End-of-Year Specimen Papers have been written to follow closely to the format of school's Mid-Year and End-of-Year examinations. It is hoped that when students use this book, to reinforce the concepts that they are weak in, they will eventually gain success in Additional Mathematics.
