The Weathering, Erosion, and Soil chapter of this Glencoe Earth Science Online Textbook Help course helps students learn essential earth science lessons of erosion and

deposition.

Chapter 7: Weathering, Erosion and Soil Flashcards | Quizlet

Chapter 7: Weathering, Erosion, and Soil Weathering Chemical or mechanical process that breaks down and changes rocks on or near Earth's surface and whose rate is influenced by factors such as precipitation and temperature.

- Find an example of weathering somewhere in the community and take a picture of it. Put the picture in a document and write a short explanation saying whether it shows mechanical weathering, chemical weathering or both, what agent or agents caused the weathering, and how rock characteristics, climate, and/or surface area affected the weathering.

Chapter 6: Weathering, Erosion, and Deposition 6.1 Weathering. Weathering is what takes place when a body of rock is exposed to the “weather” — in other words, to the forces and conditions that exist at Earth's surface.

Except for volcanic rocks and some sedimentary rocks, most rocks are formed at some depth within the crust.
