Jointly, the World Bank and the Government of Albania undertook an assessment of poverty, conducted in a qualitative manner, to gain information that could guide policy development and resource allocation.

---

The research was conducted through a series of focus groups, interviews, and surveys that permitted community members in ten areas within Albania, to define poverty in their own terms. During the ten years of reform, Albania has been buffeted by set backs which led fully 40% of respondents to indicate that socioeconomic conditions have worsened during that period. While informal coping mechanisms have been developed in many communities, these are under stress and threaten to give way. The study suggests that a poverty reduction

strategy must, at the very least, include improvements in government management, employment opportunities, provision of social services, infrastructure development, and public security.

Boards and business leaders expect their key advisors to deliver fresh insights, and increasingly expect them to demonstrate foresight. To achieve what is expected, it is crucial to understand the dynamics of conversations in

the boardroom and around the audit committee table. This book provides those unique perspectives. The journey from the ‘ mailroom to the boardroom ’ follows the story of a young banker who moved into the internal auditing profession as part of the ‘ new breed ’ , then rose through the ranks into senior leadership and chief audit executive roles, before assuming audit committee and board roles that had an immense influence on governance, risk, compliance, and

audit professionals. Success does not always follow a smooth and uneventful trajectory, and this story reflects insights from both the ups and the downs of the journey. Each chapter shares insights, better practices, case studies, practical examples, and real-life challenges and draws them together into 101 building blocks, each one providing crucial career-long learnings. The storytelling provides insights to people at all levels on the importance of positioning

oneself to step into leadership roles, helps them understand how to evaluate and pursue potential career growth opportunities, provides tips on how to holistically manage and advance their career, and inspires higher-level thinking that enhances governance, risk, compliance and audit practices.
