

Chapter 8 The Nervous System

As recognized, adventure as well as experience nearly lesson, amusement, as competently as accord can be gotten by just checking out a books **Chapter 8 The Nervous System** as a consequence it is not directly done, you could tolerate even more as regards this life, approaching the world.

We offer you this proper as without difficulty as easy exaggeration to get those all. We pay for Chapter 8 The Nervous System and numerous books collections from fictions to scientific research in any way. along with them is this Chapter 8 The Nervous System that can be your partner.

[Chapter 8 Part 1 – The Nervous System | Anatomy and Physiology](#)

Nervous system consists of special cells called nerve cells or neurons. It has a main cell body called cyton. It gives out many processes called dendrites. From it a very long process is given out. It is called axon or nerve fibre. The cell body has a nucleus.

Chapter 8 The Nervous System Think of the nervous system as a computer – lots of twisted wires (nerve fibers) that all come together to form a power cable (bundle) which sends and receives signals. It all works together to enable the computer (body) to take in a message – send it to the circuit board (brain) – translate it so the computer (our mind) can act on the information it has received.
