
Chapter 8 The Nervous System

Eventually, you will totally discover a new experience and expertise by spending more cash. still when? realize you agree to that you require to get those every needs next having significantly cash? Why dont you attempt to get something basic in the beginning? Thats something that will guide you to understand even more approaching the globe, experience, some places, behind history, amusement, and a lot more?

It is your agreed own become old to play a role reviewing habit. in the course of guides you could enjoy now is **Chapter 8 The Nervous System** below.

Chapter 8 - Nervous System Flashcards by Dana Schatz ...

Nervous system consists of special cells called nerve cells or neurons. It has a main cell body called cyton. It gives out many processes called dendrites.

From it a very long process is given out. It is called axon or nerve fibre. The cell body has a nucleus.

Selina Concise Biology Class 8 ICSE Solutions - Nervous System

The part of the nervous system outside the brain and spinal cord. It keeps the central nervous system in continuous

contact with almost every part of the body. It is composed of nerves and ganglia. The two branches are the somatic and the autonomic nervous systems.

It has a stimulant (or excitatory) effect on some parts of the body (such as the skeletal muscles) and a depressant (or inhibitory) effect on

other parts of the body (such as the heart muslce); also known as a neurotransmitter (a h-seh-till-KOH-leen)
