

## Chapter 8 The Nervous System

Eventually, you will extremely discover a supplementary experience and feat by spending more cash. yet when? realize you take on that you require to get those every needs subsequent to having significantly cash? Why dont you attempt to get something basic in the beginning? Thats something that will guide you to understand even more roughly speaking the globe, experience, some places, bearing in mind history, amusement, and a lot more?

It is your entirely own epoch to undertaking reviewing habit. in the middle of guides you could enjoy now is **Chapter 8 The Nervous System** below.

A chemical substance in the body tissues that facilitates the transmission of nerve impulses from one nerve to another. It has a stimulant (or excitatory) effect on some parts of the body (such as the skeletal muscles) and a depressant (or inhibitory) effect on other parts of the body (such as the heart muscle); also known as a neurotransmitter (ah-seh-till-KOH-leen)

[Chapter 8 - Nervous System Flashcards by Dana Schatz ...](#)

Chapter 8 The Nervous System Think of the nervous system as a computer – lots of twisted wires (nerve fibers) that all come together to form a power cable (bundle) which sends and receives signals. It all works together to enable the computer (body) to take in a message – send it to the circuit board (brain) – translate it so the computer (our mind) can act on the information it has received.
