Kuypers combines rhetorical theory and framing analysis in an examination of the interaction of the press and the president during international crisis situations in the post-Cold War world. Three crises are examined: Bosnia, Haiti, and the North Korean nuclear capability issue. Kuypers effectively demonstrates the changed nature of presidential crisis rhetoric since the end of the Cold War. Kuypers employs a new historical/critical approach to analyze both the press and the Clinton administration's handling of three international crisis situations. Using case studies of Bosnia, Haiti, and the alleged North Korean nuclear buildup in 1993, he examines contemporary presidential crisis communication and the agenda-setting and agenda-extension functions of the press. The importance of this study lies in its timeliness; President Clinton is the first atomic-age president not to have the Cold War meta-narrative to use in legitimating international crises. Prior studies in presidential crisis rhetoric found that the president received broad and consistent support during times of crisis. Kuypers found that the press often advanced an oppositional frame to that used by the Clinton administration. The press frames were found to limit the options of the President, even when the press supported a particular presidential strategy. This is a major study that will be of interest to scholars and researchers of the press, the modern presidency, and American foreign policy.

Pearls, Politics, and Power is a call to action for new political engagement and leadership from the women of America. Informed by conversations with elected women leaders from all levels, former three-term Vermont Governor and Ambassador to Switzerland Madeleine M. Kunin asks: What difference do women make? What is the worst part of politics, and what is the best part? What inspired these women to run, and how did they prepare themselves for public life? How did they raise money, protect their families' privacy, deal with criticism and attack ads, and work with the good old boys? Kunin's core message is that America needs an infusion of new leadership to better address the major problems of our time. To see how women can achieve that goal, she combines her personal experience in politics; the lessons of past women's movements; the stories of young women today who have new ideas about their role in society; and interviews with a wide range of women in positions of power, looking for clues to their leadership, as well as the effects of gender stereotyping. She interviews Senator Hillary Rodham Clinton, analyzes her campaign, and addresses the question: "Is the country ready?" Other interviewees include U.S. Representatives Loretta Sanchez, Linda Sanchez, Deborah Pryce, and Tammy Baldwin, and U.S. Senators Susan Collins, Amy Klobuchar, and Carol Moseley Braun, and Governors Kathleen Sibelius and Janet Napolitano. The next generation of women will be inspired to lead by seeing women like Nancy Pelosi wielding the gavel, and seeing themselves reflected in the portraits in statehouses, courthouses, corporate and university boardrooms, and the White House. Pearls, Politics, and Power will help ensure that this inspiration is not soured or deflected, but channeled into successful candidacies by America's leaders of tomorrow. What will it take for women to assume their rightful places in the political corridors of power?

The only full-scale history of Syngman Rhee's (1875–1965) early career in English was published nearly six decades ago. Now, in *The Making of the First Korean President*, Young Ick Lew uncovers little-known aspects of Rhee's leadership roles prior to 1948, when he became the Republic of Korea's first president. In this richly illustrated volume, Lew delves into Rhee's background, investigates his abortive diplomatic missions, and explains how and why he was impeached as the head of the Korean Provisional Government in 1925. He analyzes the numerous personal conflicts between Rhee and other prominent Korean leaders, including some close friends and supporters who eventually denounced him as an autocrat. Rhee is portrayed as a fallible yet charismatic leader who spent his life fighting in the diplomatic and propaganda arena for the independence of his beleaguered nation—a struggle that would have consumed and defeated lesser men. Based on exhaustive research that incorporates archival records as well as secondary sources in Korean, English, and Japanese, *The Making of the First Korean President* meticulously lays out the key developments of Rhee's pre-presidential career, including his early schooling in Korea, involvement in the reform movement against the Taehan ("Great Korean") Empire, and his six-year incarceration in Seoul Prison for a coup attempt on Emperor Kojong. Rhee's life in the U.S. is also examined in detail: his education at George Washington, Harvard, and Princeton universities; his evangelical work at the Seoul YMCA; his extensive activities in Hawai'i and attempts to maintain prestige and power among Koreans in the U.S. Lew concludes that, despite the manifold shortcomings in Rhee's authoritarian leadership, he was undoubtedly best prepared to assume the presidency of South Korea after the onset of the Cold War in the Korean Peninsula. Essential reading for anyone with an interest in modern Korean history, this work will serve as a lasting portrait of one of the pivotal figures in the evolution of Korea as it journeyed from colonial suppression to freedom and security.

Richard Neustadt's seminal work *Presidential Power: The Politics of Leadership* has endured for nearly four decades as the core of academic study of the American presidency. Now, building on and challenging many of the arguments in Neustadt's work, *Presidential Power: Forging the Presidency for the Twenty-first Century* offers reflections and implications from what we have learned about presidential power as the new century dawns. These essays—including a new contribution by Neustadt himself—forge a solid reexamination of Neustadt's *Presidential Power* that address questions raised but not resolved by his work. A notable aspect of this volume's analysis is the transformed institution of the presidency in the wake of the impeachment hearings of the country's last twentieth-century president, Bill Clinton. From the portrayal of presidents as persuaders to the politics of presidential transitions, each of the constituent essays in this volume provides an engaging look at the state of the American presidency.

In *President Trump and the News Media: Moral Foundations, Framing, and the Nature of Press Bias in America*, political communication researcher Jim A. Kuypers takes readers on a rhetorical framing tour de force, this time incorporating elements of Moral Foundations Theory to investigate the ideological underpinnings of press reports. Using a rhetorical version of framing analysis, Kuypers analyzes four major speeches by President Trump and compares them with the reporting on those speeches by the mainstream news media. The moral foundations of both Trump and the news media are examined to assess their respective moral/ideological underpinnings. The results turn framing theory on its head by demonstrating how frames do not give rise to moral assessments as previously thought, but rather the presence of moral foundations provide moral substance to frames as they are developed and found throughout news coverage. The results reveal how journalists inject bias consciously and unconsciously into hard news stories, and that their moral foundations act to privilege liberal concerns and denigrate conservative concerns. Kuypers conveys how news media framing acted to treat President Trump not as a source of news, but as a political opponent while at the same time helping the political opposition of the President. By evaluating journalistic practices through the lens of their own published ethical standards, Kuypers argues that contemporary journalistic practices are damaging the American Republic and makes the case for immediate incorporation of viewpoint diversity within news organizations. Scholars of communications, journalism, and political science will find this book particularly interesting.

Women Presidents of Latin America Rowman & Littlefield

This book offers the first comprehensive analysis after the Lisbon Treaty came into force of the EU Presidency's impact on national administrations in the Member States of Poland, Denmark and Cyprus before, during and after the Presidency. Placing the practical issues facing officials and policy-makers into a "governmentality" framework, it analyses the impact on the daily activities of bureaucrats and ministers. The book utilises comprehensive and novel empirical material including around 100 interviews with key officials, documentary sources and academic literature. It uncovers the kind of negotiations, management and coordination triggered by the immense challenge of presiding over the EU – including being a part of a Trio. This text will be of key interest to scholars, students of political science, European Union studies and public administration, as well as more broadly to Comparative Politics and International Relations. It will also be of interest to officials and policy members in EU Member states approaching the Presidency.

Popular interpretations of American government tend to center on the presidency. Successes and failures of government are often attributed to presidents themselves. But, though the White House stands as a powerful symbol of government, the United States has a separated system intentionally designed to distribute power, not to concentrate it. Charles O. Jones explains that focusing exclusively on the presidency can lead to a seriously distorted picture of how the national government works. The role of the president varies widely, depending on his resources, advantages, and strategic position. Public expectations often far exceed the president's personal, political, institutional, or constitutional capacities for achievement. Jones explores how presidents find their place in the permanent government and how they are "fitted in" by others, most notably those on Capitol Hill. This book shows how a separated system of government works under the circumstances created by the Constitution and encouraged by a two-party system. Jones examines the organizational challenges facing presidents, their public standing and what it means, presidential agendas and mandates, and lawmaking—how it works, where the president fits in, and how it varies from issue to issue. He compares the post-World War II presidents and identifies the strengths and weaknesses of each in working within the separated system. Jones proposes a view of government as a legitimate, even productive, form of decisionmaking and emphasizes the varying strategies available to presidents for governing. He concludes with a number of important lessons for presidents and advice on how to make the separated system work better.

The Psychological Assessment of Presidential Candidates Hard Shell Word Factory

Women are gaining ground as presidents of Latin America. Women leaders in presidential systems (particularly women directly elected by the public) were generally limited to daughters and wives of male executives or opposition leaders. With the election of Michelle Bachelet in Chile, these traditional patterns appeared to be shifting. This book asks: what conditions allowed for a broadening of routes, beyond family ties, for women in Latin America? Do women presidents of Latin America use their powers to enhance women's representation? While providing valuable insight into the big picture of women in presidential politics throughout Latin America over the last several decades, this book more closely analyzes four women presidents gaining office since 2006: Michelle Bachelet (Chile) Cristina Fern á ndez (Argentina) Laura Chinchilla (Costa Rica) and Dilma Rousseff (Brazil). It assesses the paths and impacts of Latin American women presidents and scrutinizes the ways gender shapes both aspects. No other scholar has offered such an in-depth analysis of the paths and actions of women presidents of Latin America. As such, this book offers important contributions to the gender in politics literature. Its multi-methodological approach consisting of original data collection from field work and in person interviews of political elites and experts combined with an analysis of a host of secondary sources including media articles and public opinion data makes this work exceptionally comprehensive. Its findings are applicable to those studying women, gender, and politics as well as comparative politics, Latin American politics, and leadership studies.

Impact Evaluation in Practice, Second Edition Springer

The second edition of the Impact Evaluation in Practice handbook is a comprehensive and accessible introduction to impact evaluation for policy makers and development practitioners. First published in 2011, it has been used widely across the development and academic communities. The book incorporates real-world examples to present practical guidelines for designing and implementing impact evaluations. Readers will gain an understanding of impact evaluations and the best ways to use them to design evidence-based policies and programs. The updated version covers the newest techniques for evaluating programs and includes state-of-the-art implementation advice, as well as an expanded set of examples and case studies that draw on recent development challenges. It also includes new material on research ethics and partnerships to conduct impact evaluation. The handbook is divided into four sections: Part One discusses what to evaluate and why; Part Two presents the main impact evaluation methods; Part Three addresses how to manage impact evaluations; Part Four reviews impact evaluation sampling and data collection. Case studies illustrate different applications of impact evaluations. The book links to complementary instructional material available online, including an applied case as well as questions and answers. The updated second edition will be a valuable resource for the international development community, universities, and policy makers looking to build better evidence around what works in development.
