Hatchet Letts and Lonsdale
Education is a hot topic.
From the stage of
presidential debates to
tonight's dinner table, it is
an issue that most
Americans are deeply
concerned about. While
there are many strategies
for improving the
educational process, we
need a way to find out what
works and what doesn't

work as well. Educational
assessment seeks to
determine just how well
students are learning and is
an integral part of our quest
for improved education. The
nation is pinning greater
expectations on educational
assessment than ever
before. We look to these
assessment tools when
documenting whether
students and institutions are
truly meeting education
goals. But we must stop and
ask a crucial question: What
kind of assessment is most
effective? At a time when
traditional testing is subject
to increasing criticism,
research suggests that new,

exciting approaches to
assessment may be on the
horizon. Advances in the
sciences of how people
learn and how to measure
such learning offer the hope
of developing new kinds of
assessments-assessments
that help students succeed
in school by making as clear
as possible the nature of
their accomplishments and
the progress of their
learning. Knowing What
Students Know essentially
explains how expanding
knowledge in the scientific
fields of human learning and
educational measurement
can form the foundations of
an improved approach to

assessment. These advances suggest ways that the targets of assessment- what students know and how well they know it- as well as the methods used to make inferences about student learning can be made more valid and instructionally useful. Principles for designing and using these new kinds of assessments are presented, and examples are used to illustrate the principles. Implications for policy, practice, and research are also explored. With the promise of a productive research-based approach to assessment of student

learning, *Knowing What Students Know* will be important to education administrators, assessment designers, teachers and teacher educators, and education advocates.
