Abstract: Beginning with the basics of the financial marketplace and the environment in which it operates, this book focuses on decision making within an individual business. Financial statement analysis is paramount to all phases of financial decision making. The financial manager must find ways to measure profitability, manage working capital, and budget to manage the risks of the business. The concept of time value of money, capital sources, costs and budgeting involve managerial decisions that effect the character, financial health and even the survival of a business. Each chapter offers problems and solutions that apply techniques discussed. Practitioner-oriented sampling of the major tools used to deal with current public-sector fiscal issues. Directed at state and local financial managers, Government Budgeting presents, in a short and succinct manner, a sampling of the major tools used to deal with current fiscal problems. George M. Guess provides examples from a number of states and localities and explains how to use them in diverse situations. At the end of each chapter, cases, exercises and/or questions are provided for further study. The chapters cover the major topics needed by today's practitioners: core concepts and definitions of budgeting and financial management; how to analyze the revenue budget and evaluate revenue sources; how one might plan expenditures and prepare an annual request; how capital projects should (and should not) be planned, analyzed, compared, placed into a capital improvements program, and financed; and the critical topic of budget implementation. Without claiming that practical tools can resolve every problem, the book suggests that if all stakeholders used such analytic tools the outcomes might be better for the general welfare.

Many nonprofits rely on conventional methods of making and managing money—from donations to cash reserves, endowments, and capital building campaigns—in hopes of securing financial stability for the future. Yet these acquired funds often remain tantalizingly out of reach for day-to-day operations; the balance sheet may look good, but the actual cash available is often surprisingly low. In order to achieve their missions, nonprofits need to fundamentally change the way they think about money. Richard and Anna Linzer introduce a

groundbreaking approach to nonprofit financial management based on cash flow and the use of credit that gives nonprofits the money they need, when they need it while ensuring the long-term financial well-being of the organization. Their revolutionary and effective financial model is explained in clear and understandable terms for decision makers in both large and small nonprofit organizations. "The Linzers are revolutionaries in the nonprofit financial world and leaders should take notice!" --Martha J. Perry, associate executive director, McCune Foundation "A great book for any board member of a nonprofit organization." --Michael Schlesinger, attorney, author, lecturer, and commentator in the field of taxation "Nonprofits now have a choice: Muddle along from crisis to crisis or follow the advice in this excellent, innovative book." --Irene Y. Namkung, past board president, the Western Arts Alliance, Northwest Folklife, and Oregon Potters' Guild "It's heresy, but it works. The Cash Flow Solution presents solid steps to financial sanity in the nonprofit boardroom." --James A. Kolb, West Sound Academy "From time to time a book makes so much sense you wonder why someone did not write it a long time ago. Richard and Anna Linzer's book "The Cash Flow Solution" is such a book. The principles are as fundamental and rock-solid as they are innovative. Applying their suggestions could help many troubled organizations survive and thrive. More importantly, the Linzers' insight could lead many nonprofits in coming closer to fulfilling their potential to deal with the many needs of our society." --Mike Pedretti, Artistic Director and President, Movement Theatre International
