The Sound of Waves Book Review Chapter 6 Review questions
1)How are most waves produced in the surface ocean? What type of energy is transferred from this source to the surface waters? Winds are the primary source to generate waves in the surface ocean. The friction between the moving air and the sea surface transfers some of the wind's kinetic energy to the

sea surface producing waves.

3) For deep-water waves, the

The Physics Classroom Tutorial presents physics concepts and principles in an easy-to-understand language. Conceptual ideas develop logically and sequentially, ultimately leading into the mathematics of the topics. Each lesson includes informative graphics, occasional animations and videos, and Check Your Understanding sections that allow the user to practice what is taught.

Quizlet

Typically, your book chapter review should contain info about what the part was about, the main topic that the author discusses in the chapter, the insights of the author, as well as the so-called lesson that readers take away from the chapter. The take-away lesson will serve as a strong foundation for your conclusion; keep that in mind.
