Subsection - definition of subsection by The Free Dictionary

Notice that you do not need to specify section numbers; LaTeX will sort that out for you. Also, for sections, you do not need to use `\begin` and `\end` commands to indicate which content belongs to a given block. LaTeX provides 7 levels of depth for defining sections (see table below). Each section in this table is a subsection of the one above it.

5.3 Chapters, Sections, Subsections ...

The command `\section{}` marks the beginning of a new section, inside the braces is set the title. Section numbering is automatic and can be disabled. [edit] Document Sectioning L a T e X can organize, number, and index chapters and sections of document.

Sections and chapters - Overleaf, Online LaTeX Editor

For most statute compilations, the hierarchy is title -> chapter -> section -> subsection. Most citations are formatted [title number] [compilation] [section(subsection)]. So subsection (c) of section 2703 of title 28 of the United States Code would be cited 28 U.S.C. 2703(c). Paragraph divisions are most frequently found in contracts, not statutes.

LaTeX help 1.1 - Sectioning

Subsection A of the Section 12 provides that for purposes of the disposal of an application under subsection (2), the court may, in the interest of expeditious disposal, apply such fair procedure as the circumstances of the case warrant, and shall, unless, for reasons to be recorded it directs otherwise, order any fact to be proved or disproved by affidavit.'

General Law - Part I, Title I, Chapter 4, Section 7

`\section` `\subsection` `\subsubsection` `\paragraph` ... All sectioning commands take the same general form, i.e., `\chapter[optional]{title}` In addition to providing the heading in the text, the mandatory argument of the sectioning command can appear in two other places: The table of contents

How can we differentiate the Word Articles and sections ...

Where articles, numbered paragraphs or other subdivisions that are identified by a number or a letter are inserted into the enacting terms of an existing act, they are given the number or letter of the preceding subdivision of the same level in addition to the letter 'a', 'b', 'c', 'd', etc. See also Section 3.3.2. (4)

The commands to create section headings are straightforward: `\section{}` `\subsection{}` `\subsubsection{}` `\paragraph{}` `\subparagraph{}` Example output of sections and subsections. The

section commands are numbered and will appear in the table of contents of your document. Paragraphs aren't numbered and won't show in the table of contents. Here an ...
