Understanding Character Education

introduces readers to the key ideas, practices and concepts that are shaping character education in schools today. The book explores the principles underpinning character education and the pedagogical practices which ensure it comes alive in schools. Each chapter includes a variety of features to help navigate through the ideas, themes and practices examined. These include:

- Chapter objectives to help readers understand the core focus and intentions of each chapter
- Reflective activities to help readers to think more deeply about particular ideas and issues, and to consider how practices described are, or could be, applied in their own contexts
- Case studies to help readers to understand how character education is approached and implemented

by educators in and beyond schools

- Annotated further readings to help readers take a closer and more detailed look at the methods, applications and issues covered

Character Education Volume 17 #1
Military academies have served youth for more than a century with proud traditions of producing graduates who are scholars, leaders, and athletes who adhere to a code of honor

and ethical principles as they take the knowledge, skills, and dispositions gained at those academies into higher education, the business world, military service, civic endeavors, and the broader workforce. There is a current gap and need for research that explores the various components of a K-20 military school/college education and how those components successfully produce leaders of character for our military, civic, academic, and business worlds both in the United States and abroad. The Handbook of Research on Character and Leadership

Development in Military Schools synthesizes research on the impact of military academies by providing a singular compendium of current academic studies on the graduates of military academies and the communities of which they enter after graduation. The chapters will explore the academics, leadership, character development, citizenship, athletics, and other dimensions of both global and national, and both private and public, military academies. This book is ideal for current leaders, staffs, governing board members, and alumni of military academies

both in the United States and internationally along with policymakers, government officials, practitioners, researchers, academicians, and students interested in the implications of character and leadership development on individuals enrolled in or graduated from military schools. *How Children Succeed* Bantam Summary: The author "offers portraits of three high-performing urban schools that have made character development central to their mission. The development of character is a valued objective for many kinds of educational programs that take place both in and outside of school. Educators and administrators who develop and run programs that seek to develop character recognize that the established approaches for doing so have much in common, and they are eager to learn about promising practices used in other settings,

evidence of effectiveness, and ways to measure the effectiveness of their own approaches. In July 2016, the National Academies of Sciences, Engineering, and Medicine held a workshop to review research and practice relevant to the development of character, with a particular focus on ideas that can support the adults who develop and run out-of-school programs. This publication summarizes the presentations and discussions from the workshop.

Character Development IAP "Character" has become a front-and-center topic in contemporary discourse, but this term does not have a fixed meaning. Character may be

simply defined by what someone does not do, but a more active and thorough definition is necessary, one that addresses certain vital questions. Is character a singular characteristic of an individual, or is it composed of different aspects? Does character--however we define it--exist in degrees, or is it simply something one happens to have? How can character be developed? Can it be learned? Relatedly, can it be taught, and who might be the most effective teacher? What roles are played by family, schools, the media, religion, and the larger culture? This groundbreaking handbook of character strengths and virtues is the first progress report from a prestigious group of researchers who have undertaken the systematic classification and measurement of widely valued positive traits. They approach good character in terms of separate strengths--authenticity, persistence, kindness, gratitude, hope, humor, and so on--each of which exists in degrees. Character Strengths and Virtues classifies twenty-four specific strengths under six broad virtues that consistently emerge across history and culture: wisdom, courage,

humanity, justice, temperance, and transcendence. Each strength is thoroughly examined in its own chapter, with special attention to its meaning, explanation, measurement, causes, correlates, consequences, and development across the life span, as well as to strategies for its deliberate cultivation. This book demands the attention of anyone interested in psychology and what it can teach about the good life.

Teaching Character and Virtue in Schools addresses the contemporary issues of quantification and measurement in educational settings. The authors draw on the research of the Jubilee Centre at the University of Birmingham in order to investigate the concern that the conventional wisdom, sound judgement and professional discretion of teachers is being diminished and control mistakenly given over to administrators, policymakers and inspectors which in turn is negatively effecting pupils' character development. The books calls for subject competence to be complemented by practical wisdom and good character in teaching staff. It posits that the constituent virtues of good character can be learned and taught, that education is an intrinsically moral enterprise and that character education should be intentional, organised and reflective. The book draws on the Jubilee Centre's expertise in support of its claims and successfully integrates the fields of educational studies, psychology, sociology, philosophy and theology in its examination of contemporary educational practices and their wider effect on society as a whole. It offers sample lessons as well as a framework for character education in schools. The book encourages the view that character education is about helping students grasp what is ethically important and how to act for the right reasons so that

they can become more autonomous and reflective individuals within the framework of a democratic society. Particularly interested readers will be educational leaders, teachers, those undertaking research in the field of education as well as policy analysts with a keen interest in developing the character and good sense of learners today.
