gaze to the art of mixing and gives followers and the uninitiated reason to hope if not for logic and civility in the recording studio then at least for a good sounding record. With a firm commitment to art over technology and to maintaining a grasp of each, Mixerman outlines his own approach to recording success, based on his years mixing records in all genres of music for all kinds of artists, often under trying circumstances. As he states in his introduction to the new volume, "Even if you're not a professional mixer, even if you're a musician trying to mix your own work or a studio owner in a smaller market, you have your own set of pressures to deal with while you're mixing. Regardless of what those pressures are, it's important to identify and recognize them, if for no other reason than so you can learn to completely ignore them." But how? This book looks at the works of James VanDerZee, who "was the pre-eminent studio photographer of African-American life in the years between the two World Wars." - page 3. *World of Warcraft Programming* CRC Press Media Ownership and Agenda Control offers a detailed examination of media ownership amidst the complexities of the information age, from the resurgence of press barons to the new influence wielded by internet giants. Much of the discussion pivots around recent revelations and controversies in the media industry, such as the findings published in 2012 from the Leveson Inquiry, the US Federal Communications Commission's ruling on net neutrality in 2015, Edward Snowden's decision to leak National Security Agency (NSA) documents in 2013 and the legal battles over ancillary copyrights waged in Germany and elsewhere. Justin Schlosberg traces the obscure and often unnoticed ways in which agendas continue to be shaped by a small number of individual and institutional megaphones, despite the rise of grassroots and participatory platforms, and despite ubiquitous displays of adversarial journalism. Above all, it explores the web of connections and interdependence that binds old and new media gatekeepers, and cements them to the surveillance and warfare state. This ultimately

foregrounds the book's call for a radical rethink of ownership regulation, situating the movement for progressive media reform alongside wider struggles against the iniquities and injustices of global capitalism. This book's re-evaluation of the nature of media ownership and control in a postdigital world will prove to be an invaluable resource for students of media studies and journalism, as well as all those with an interest in the changing dynamics of media power.
