Oxford University Press, USA

Maximum PC is the magazine that every computer fanatic, PC gamer or content creator must read. Each and every issue is packed with punishing product reviews, insightful and innovative how-to stories and the illuminating technical articles that enthusiasts crave.

PC World Berkley Publishing Group

This book constitutes thoroughly reviewed and selected short papers presented at the 25th East-European Conference on Advances in Databases and Information Systems, ADBIS 2021, as well as papers presented at doctoral consortium and ADBIS 2021 workshops. Due to the COVID-19 the conference and satellite events were held in hybrid mode. The 11 full papers and 18 short papers were carefully reviewed and selected from 97 total submissions. This volume presents the papers that have been accepted for the following satellite events: Workshop on Intelligent Data - From Data to Knowledge, DOING 2021; International Symposium on Data-Driven Process Discovery and Analysis, SIMPDA 2021; Workshop on Modern Approaches in Data Engineering and Information System Design, MADEISD 2021; Workshop on Advances in Data Systems Management, Engineering, and Analytics, MegaData 2021; Workshop on Computational Aspects of Network Science, CAoNS 2021; Doctoral Consortium.

New Trends in Database and Information Systems Edward Elgar Publishing

AUTOMATED VEHICLES AND MaaS A topical overview of the issues facing automated driving systems and Mobility as a Service, identifies the obstacles to

implementation and offers potential solutions. Advances in cooperative and automated vehicle (CAV) technologies, cultural and socio-economic shifts, measures to combat climate change, social pressures to reduce road deaths and injuries, and changing attitudes toward self-driving cars, are creating new and exciting mobility scenarios worldwide. However, many obstacles remain and are compounded by the consequences of COVID-19. Mobility as a Service (MaaS) integrates various forms of public and private transport services into a single on-demand mobility service. Combining trains, cars, buses, bicycles, and other forms of transport, MaaS promises a convenient, cost-effective, and eco-friendly alternative to private automobiles. *Automated Vehicles and MaaS: Removing the Barriers* is an up-to-date overview of the contemporary challenges facing CAVs and MaaS. Written in a clear and accessible style, this timely volume summarizes recent research studies, describes the evolution of automated driving systems and MaaS, identifies the barriers to their widespread adoption, and proposes potential solutions to overcome and remove these barriers. The text focuses on the claims, realities, politics, new organizational roles, and implementation problems associated with CAVs and MaaS—providing industry professionals, policymakers, planners, administrators, and investors with a clear understanding of the issues facing the introduction of automated driving systems and MaaS. This important guide and reference: Provides an overview of recent progress, the current state of the art, and discussion of future objectives. Presents both technical background and general overview of automated driving systems and MaaS. Covers political, commercial, and practical issues, as well as technical and research content, yet suitable for non-specialists. Helps readers make informed decisions and realistic estimates for implementing mobility solutions and new business models for transport services. Includes an extensive bibliography with direct links to in-depth technical engineering and research information. *Automated Vehicles and MaaS: Removing the Barriers* is an essential resource for transport providers, vehicle manufacturers, urban and transport planners, students of transportation, vehicle technology, and urban planning, and transport policy and strategy managers, advisors, and reviewers.

PCMag.com is a leading authority on technology, delivering Labs-based, independent reviews of the latest products and services. Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology.

The Oxford American Desk Dictionary and Thesaurus Oxford University Press, USA

Everyone has an opinion on transport: it significantly affects daily lives. This book highlights key transport opportunities and challenges, and identifies research requirements to inform policy discussion and support better societal outcomes. It does this by scanning across modes, continents, technologies and socio-economic settings, looking for common threads, points of difference and opportunities to make a difference. The book should appeal to prospective post-graduate students, professionals in transport and related fields, and those interested in better places and good discussions.

Stop Getting Ripped Off Springer Nature

New York Times bestselling author of *Gotcha Capitalism* and MSNBC.com "Red Tape Chronicles" columnist Bob Sullivan strikes again to help you evade the financial traps big businesses set for unwary consumers—and shows you how to get the best possible deals every single time.

Today's marketplace is full of hidden fees, fine print, and other booby traps designed to trip you up and take your money. You may be losing big even when you think you're getting a steal! But with Sullivan's keen guidance and sensible advice, you can save money and regain control of your financial life. Clearly and concisely, Sullivan reveals

- why American consumers make such easy targets for corporate America (you'll be stunned, for example, at how poor our math skills are)
- how Wall Street will skim off one third of your retirement money (avoid this trap with Sullivan's new "Pitfall-Proof

Pyramid") • the myths behind credit-card reward programs and "the 21st-Century Bank Account" • the real numbers to focus on when buying a new car • why you should spend more time shopping for your mortgage than your home • the key questions you must ask before buying life insurance • the secrets to saving for college and paying off student loans the right way • the best deals on cell phones and pay-TV service With Sullivan's empowering message, financial savvy, and knowledge of consumers' wants and needs, you can outsmart the system, keep your hard-earned cash, and finally stop getting ripped off. And you'll become part of a growing grass-roots movement to rein in the abuses of corporate America before consumers get hurt by another boom-and-bust cycle. From the Trade Paperback edition.

Engineering News-record

Presents more than 150,000 up-to-date entries with their definitions and synonyms, as well as quick-reference sections on weights and measures, chemical elements, signs and symbols, U.S. presidents, and state capitals.

Indexes the Times, Sunday times and magazine, Times literary supplement, Times educational supplement, Times educational supplement Scotland, and the Times higher education supplement.

The Oxford Desk Dictionary and Thesaurus

This book contains the refereed proceedings of the Third International Conference on Software Business (ICSOB) held in Cambridge, MA, USA, in June 2012. The software business refers to commercial activities in the software industry, aimed at generating revenues from the design, delivery, and maintenance of software products and IT services to enterprises and

individual customers, as well as from digital content. Although this business shares common features with other knowledge-intensive markets, it carries many inherent features making it a challenging domain for research. The 20 full and 10 short papers accepted for ICSOB were selected from 60 submissions and are organized in sections on software product management, organizational transformation, industry transformation, software platforms and ecosystems, and emerging trends.

Software Business

Features quick-reference icons on usage, spelling, and pronunciations, new illustrations, new sixty-four page reference guide, and up-to-date coverage of American English
