A biography of Emma Darwin, wife and cousin of Charles Darwin, discussing her childhood in a large family, her role as the mother of ten children, and the Christian faith that caused her to worry about her husband's soul.

Emma Darwin, Wife of Charles Darwin Harper Collins

A beautifully illustrated volume follows a lesser-known Victorian naturalist and explorer on his global journeys — and reveals how he developed his own theory of evolution. Everyone knows Charles Darwin, the famous naturalist who proposed a theory of evolution. But not everyone knows the story of Alfred Russel Wallace, Darwin's friend and rival who simultaneously discovered the process of natural selection. This sumptuously illustrated book tells Wallace's story, from his humble beginnings to his adventures in the Amazon rain forest and Malay Archipelago, and demonstrates the great contribution he made to one of the most important scientific discoveries of all time.

'Period Piece' is a 1952 autobiographical memoir by Gwen Raverat focusing on her childhood in late 19th Century Cambridge society. Raverat's childhood memories and coming of age during the last years of Victoria's rule capture a young woman's views of dons and eccentrics in Cambridge during the 1890s. It includes anecdotes and illustrations of many of her extended family.

Charles Darwin In Cambridge: The Most Joyful Years W. W. Norton & Company

A powerful novel of refugees escaping from war-torn Syria, masterfully told by a journalist who witnessed the crisis firsthand. In a country ripped apart by war, Tareq lives with his big and loving family . . . until the bombs strike. His city is in ruins. His life is

destroyed. And those who have survived are left to figure out their uncertain future. Tareq's family knows that to continue to stay alive, they must leave. As they travel as refugees from Syria to Turkey to Greece, facing danger at every turn, Tareq must find the resilience and courage to complete his harrowing journey. While this is one family's story, it is also the timeless tale of the heartbreaking consequences of all wars, all tragedy, narrated by Destiny itself. When you are a refugee, success is outliving your loss. An award-winning author and journalist—and a refugee herself—Atia Abawi captures the hope that spurs people forward against all odds and the love that makes that hope grow. Praise for *A Land of Permanent Goodbyes*: Featured on NPR's Morning Edition! Featured by Dana Perino's on The Five! Featured as a most-anticipated book of 2018 on The Huffington Post! "[A] heartbreaking and to-the-minute timely story of the Syrian refugee crisis. Abawi gives even more humanity, depth, and understanding to the headlines." —Bustle "From award-winning journalist Abawi comes an unforgettable novel that brings readers face to face with the global refugee crisis . . . A heartbreaking, haunting, and necessary story that offers hope while laying bare the bleakness of the world." —Kirkus Reviews, starred review "Abawi skillfully places humanity enmeshed in war into two sides: the 'hunters' who feed on the suffering and the 'helpers' who lend a hand. An inspiring, timely, and must-have account about the Syrian refugee disaster and the perils of all wars."—School Library Journal, starred review "[A] gripping and heartrending novel . . . [and an] upsetting yet beautifully rendered portrayal of an ongoing humanitarian crisis."—Publishers Weekly, starred review "As author Atia Abawi artfully illustrates, refugees are created by circumstances that can happen anywhere. A perfect companion novel to Alan Gratz's *Refugee*, this humanizing, often harrowing and sometimes transcendent novel fosters compassion and understanding."—BookPage, Top Teen Pick "[T]his could be paired with Sepetys'

book . . . *Salt to the Sea*, for a multi-era look at the casualties of war." —The Bulletin of the Center for Children's Books "This is a harrowing and vitally important novel about an ongoing crisis. Tareq's story will linger with readers long after they've turned the final page." —Bookish "A Land of Permanent Goodbyes is an engrossing, heartbreaking story of survival, giving readers an authentic glimpse of the suffering and destruction in Syria."—Voice of Youth Advocates "A well-written, well-researched book."—School Library Connection "This touching read will stir empathy and compassion about the harrowing plight of refugees. Abawi . . . helps give perspective on how religion can be used to help create a world where the most basic human rights are violated."—Booklist

Darwin and His Children Penguin
A fresh account of Charles Darwin's rich personal and professional lives, well beyond *On the Origin of Species*. In 1859 Charles Darwin published *On the Origin of Species*. With this bedrock of biology books, Darwin carved a new origin-story for all life: evolution rather than creation. But this single book is not the whole story. In this new biography, J. David Archibald describes and analyzes Darwin's prodigious body of work and complex relationships with colleagues, as well as his equally productive home life—he lived with his wife and seven surviving children in the bustling environs of Down House, south of London. There, among his family and friends, Darwin continued to experiment and write many more books on orchids, sex, emotions, and earthworms until his death in 1882, when he was honored with burial at Westminster Abbey. This is a fresh, up-to-date account of the life and work of a most remarkable man.

This work takes us into the Darwin family's private world to tell the story of Charles and Emma Darwin's and their first daughter Annie, who died at the age of ten. When Annie was a baby, Darwin doted on her, but also watched her with his researches in mind, and thought about man's animal origins. As Annie grew into a lively child, Darwin worked secretly on his theory of evolution, but his ideas were just one part of the family's life amid the wealth and poverty of Victorian England. Randal Keynes, Darwin's great-great-grandson and the current guardian of Annie's box, conjures up a world in which great thinkers - including Carlyle, Babbage and George Eliot - were struggling with ideas that were to shake mankind to its core.

Darwin's Rival: Alfred Russel Wallace and the Search for Evolution Regnery Publishing

Annie was Charles and Emma Darwin's adored first daughter. Her death at the age of ten broke their hearts. At the time, Darwin was working secretly on his theory of evolution and the pain of his daughter's death sharpened his conviction that natural laws have nothing to do with divine intervention. But he became racked with anxiety about his ground-breaking theories in *The Origin of Species*, and the controversy they would cause. As Darwin's theories continue to shape so much of our thinking about human nature today, *Creation* gives us fresh insight into the private life of a man who viewed the world in a new and extraordinary way.

The publication of Charles Darwin's *On the Origin of Species* in 1859 is widely regarded as a turning point in knowledge of the natural world. But Darwin's theory of natural selection was not developed in a vacuum; rather, it represents the culmination of an enormous shift in scientific and popular opinion on the subject of species mutability from the late eighteenth century onward. Through her insightful introduction and engaging collection of documents, Sandra Herbert examines this era of scientific thought and the startling discoveries that led Darwin and others to the conclusion that life has evolved. A wide range of documents from over a dozen authors, and excerpts from Darwin's own notebooks and *On the Origin of Species* -- offer a fascinating glimpse into this crucial era of scientific thought.

Darwin's Backyard: How Small Experiments Led to a Big Theory Henry Holt and Company (BYR)

From award-winning author Deborah Heiligman comes *Torpedoed*, a true account of the attack and sinking of the passenger ship *SS City of Benares*, which was evacuating children from England during WWII. Amid the constant rain of German bombs and the escalating violence of World War II, British parents by the thousands chose to send their children out of the country: the wealthy, independently; the poor, through a government relocation program called CORB. In September 1940, passenger liner *SS City of Benares* set sail for Canada with one hundred children on board. When the war ships escorting the *Benares* departed, a German submarine torpedoed what became known as the *Children's Ship*. Out of tragedy, ordinary people became heroes. This is their story. This title has Common Core connections.

Much has been written about Charles Darwin but this is the first biography of his strong, intelligent wife. Emma Wedgwood, granddaughter of the famous Josiah, married Charles Darwin in 1839, three years after he returned from his extraordinary voyage on the *Beagle*. Their life together was intellectually exciting though overshadowed by personal tragedy. Edna Healey has discovered

new, and hitherto unpublished, material and has had the full support of the Darwin family in writing this major biography.

The Works of Charles Darwin, Volume 17 Sola Scriptura Ministries International Printz Honor Book • YALSA Nonfiction Award Winner • Boston Globe-Horn Book Award Winner • SCBWI Golden Kite Winner • Cybils Senior High Nonfiction Award Winner From the author of National Book Award finalist *Charles and Emma* comes an incredible story of brotherly love. The deep and enduring friendship between Vincent and Theo Van Gogh shaped both brothers' lives. Confidant, champion, sympathizer, friend—Theo supported Vincent as he struggled to find his path in life. They shared everything, swapping stories of lovers and friends, successes and disappointments, dreams and ambitions. Meticulously researched, drawing on the 658 letters Vincent wrote to Theo during his lifetime, Deborah Heiligman weaves a tale of two lives intertwined and the extraordinary love of the Van Gogh brothers.

From the Big Bang to God Knopf Books for Young Readers

Presents a critical examination of the life and theories of Charles Darwin, describing the social, religious, and scientific implications of his work. Darwin, His Daughter, and Human Evolution 4th Estate, Limited

While much has been written about the life and works of Charles Darwin, the lives of his ten children remain largely unexamined. Most "Darwin books" consider his children as footnotes to the life of their famous father and close with the death of Charles Darwin. This is the only book that deals substantially with the lives of his children from their birth to their death, each in his or her own chapter. Tim Berra's *Darwin and His Children: His Other Legacy* explores Darwin's marriage to his first cousin, Emma Wedgwood, a devout Unitarian, who worried that her husband's lack of faith would keep them apart in eternity, and describes the early death of three children of this consanguineous marriage. Many of the other children rose to prominence in their own fields. William Darwin became a banker and tended the Darwin family's substantial wealth. Henrietta Darwin edited Charles' books and wrote a biography of her mother. Three of Darwin's sons were knighted and elected Fellows of the Royal Society: Sir George Darwin was the world's expert on tides, Sir Francis Darwin developed the new field of plant physiology, and Sir Horace Darwin founded the world-

class Cambridge Scientific Instrument Company. Major Leonard Darwin was a military man, Member of Parliament, and patron of early genetic research. This book, richly illustrated with photographs of the Darwin family, demonstrates the intellectual atmosphere whirling about the Darwin household, portrays loving family relationships, and explores entertaining vignettes from their lives.

The Autobiography of Charles Darwin is an autobiography by the English naturalist with the world-famous Charles Darwin. Darwin wrote the text, which he entitled *Recollections of the Development of my Mind and Character*, as a memoir for the closest people. According to his words, he started writing it on about May 28, 1876, and had finished it by August 3. The lost passages were later restored by Darwin's granddaughter Nora Barlow in a 1958 edition to commemorate the 100th anniversary of *The Origin of Species* publication.

Charles Darwin and the Voyage of the Beagle DigiCat

This remarkable book brings us an

intimate and moving interpretation of the life and work of Charles Darwin, by Ruth Padel, an acclaimed British poet and a direct descendant of the famous scientist. Charles Darwin, born in 1809, lost his mother at the age of eight, repressed all memory of her, and poured his passion into solitary walks, newt collecting, and shooting. His five-year voyage on H.M.S. *Beagle*, when he was in his twenties, changed his life. Afterward, he began publishing his findings and working privately on groundbreaking theories about the development of animal species, including human beings, and he made a nervous proposal to his cousin Emma. Padel's poems sparkle with nuance and feeling as she shows us the marriage that ensued, and the rich, creative atmosphere the Darwins provided for their ten children. Charles and Emma were happy in each other, but both were painfully aware of the gulf between her deep Christian faith and his increasing religious doubt. The death of three of their children accentuated this gulf. For Darwin, death and extinction were nature's way of developing new species: the survival of the fittest; for Emma, death was a prelude to the afterlife. These marvelous poems—enriched by helpful marginal notes and by Padel's ability to move among multiple viewpoints, always keeping Darwin at the center—bring to life the great scientist as well as the private man and tender father. This is a biography in rare form, with an unquantifiable depth of family intimacy and warmth.

The Darwin Myth Knopf
Charles Darwin published *The Origin of Species*, his revolutionary tract on evolution and the fundamental ideas involved, in 1859. Nearly 150 years later, the theory of evolution continues to create tension between the scientific and religious communities. Challenges about teaching the theory of evolution in schools occur annually all over the country. This same debate raged within Darwin himself, and played an important part in his marriage: his wife, Emma, was quite religious, and her faith gave Charles a lot to think about as he worked on a theory that continues to spark intense debates. Deborah Heiligman's new biography of Charles Darwin is a thought-provoking account of the man behind evolutionary theory: how his personal life affected his work and vice versa. The end result is an engaging exploration of history, science, and religion for young readers. *Charles and Emma* is a 2009 National Book Award Finalist for Young People's Literature.
