Trial by Silence Portpolio

'Essential reading for all those interested in how India will deal with its greatest strategic challenge, an increasingly powerful China'-SHIVSHANKAR MENON

'Vijay Gokhale strips away the illusion that China ever shared convergent interests with India in Asia and globally. A disconcerting read, but indispensable.'-ASHLEY J. TELLIS

India's relations with the People's Republic of China have captured the popular imagination ever since the 1950s but have rarely merited a detailed understanding of the issues. Individual episodes tend to arouse lively debate, which often dissipates without a deeper exploration of the factors that shaped the outcomes. This book explores the dynamics of negotiation between the two countries, from the early years after Independence until the current

times, through the prism of six historical and recent events in the India-China relationship. The purpose is to identify the strategy, tactics and tools that China employs in its diplomatic negotiations with India, and the learnings for India from its past dealings with China that may prove helpful in future negotiations with the country.

ONE AMAZING STORY.
TWO DIFFERENT

ENDINGS. At the end of Perumal Murugan's trailblazing novel *One Part Woman*, readers are left on a cliffhanger as Kali and Ponna's intense love for each other is torn to shreds. What is going to happen next to this beloved couple? In *Trial by Silence*-one of two inventive sequels that picks up the story right where *One Part Woman* ends-Kali is determined to punish Ponna for what he believes is an absolute betrayal. But Ponna is equally upset at being forced to atone for something that was not her fault. In the wake of the

temple festival, both must now confront harsh new uncertainties in their once idyllic life together. In Murugan's magical hands, this story reaches a surprising and dramatic conclusion.

My Life in Full Harperperennial Theoriginofevolutionaryalgorithm wasanattempttomimicsomeofthe processes taking place in natural evolution. Although the details of biological evolution are not completely understood (even nowadays), there exist some points supported by strong experimental evidence:

- Evolution is a process operating over chromosomes rather than over organisms. The former are organic tools encoding the structure of a living being, i.e., a creature is “built” decoding a set of chromosomes.
- Natural selection is the mechanism that relates chromosomes with the efficiency of the entity they represent, thus allowing that efficient organism which is well-adapted to the environment to reproduce more often than those which are not.
- The

evolutionary process takes place during the reproduction stage.

There exists a large number of reproductive mechanisms in Nature. Most common ones are mutation (that causes the chromosomes of offspring to be different to those of the parents) and recombination (that combines the chromosomes of the parents to produce the offspring). Based upon the features above, the three mentioned models of evolutionary computing were independently (and almost simultaneously) developed.

An intimate and powerful memoir by the trailblazing former CEO of PepsiCo For a dozen years as one of the world's most admired CEOs, Indra Nooyi redefined what it means to be an exceptional leader. The first woman of color and immigrant to run a Fortune 50 company — and one of the foremost strategic thinkers of

our time — she transformed PepsiCo with a unique vision, a vigorous pursuit of excellence, and a deep sense of purpose. Now, in a rich memoir brimming with grace, grit, and good humor, *My Life in Full* offers a firsthand view of Nooyi ' s legendary career and the sacrifices it so often demanded. Nooyi takes us through the events that shaped her, from her childhood and early education in 1960s India, to the Yale School of Management, to her rise as a corporate consultant and strategist who soon ascended into the most senior executive ranks. The book offers an inside look at PepsiCo, and Nooyi ' s thinking as she steered the iconic American company toward healthier products and reinvented its environmental profile, despite resistance at every turn. For the first time and in raw detail, Nooyi also lays bare the difficulties that came with

managing her demanding job with a growing family, and what she learned along the way. She makes a clear, actionable, urgent call for business and government to prioritize the care ecosystem, paid leave and work flexibility, and a convincing argument for how improving company and community support for young family builders will unleash the economy ' s full potential. Generous, authoritative, and grounded in lived experience, *My Life in Full* is the story of an extraordinary leader ' s life, a moving tribute to the relationships that created it, and a blueprint for 21st century prosperity. Mind Master Farrar, Straus and Giroux Breaking away from the shackles of family-run Bombay Oils Industries Ltd, Harsh Mariwala founded Marico in 1987. Today, the homegrown Marico is a leading international FMCG giant which recorded an annual turnover of over Rs 8000 crore

last year. Their products, like Parachute, Nihar Naturals, Saffola, Set Wet, Livon and Mediker, are market leaders in their categories. This is the story of grit, gumption and growth, and of the core values of trust, transparency and innovation which have brought the company to its current stature. Co-authored by leading management thinker and guru Ram Charan, Harsh Realities is a much-awaited business book by an innovative and clear-headed leader who built a highly professional, competitive business from the ground up.

An extraordinary and rare insight into how a few determined entrepreneurs created an icon... - C. K. Prahalad

The targets were

stupendous and considered unachievable by almost everyone. Slightly over two years to find a suitable partner, finalize all legal documentation, get governmental approval to these agreements as well as to the investment proposals, build a factory, develop a supplier base to meet localization regulations, create a sales and service network, and develop and launch a peoples car that would sell 100,000 a year, in a sector where Indian expertise was limited. And to do this as a public sector company, having to follow all governmental systems and procedures, and having to please both its masters in the government and Suzuki Motor Corporation. However, the Maruti project succeeded, and in ways that were unimaginable in 1983.

The car revolutionized the industry and put a country on wheels. Suddenly, ordinary middle-class men and women could aspire to own a reliable, economical and modern car, and the steep sales targets were easily met. Twenty-six years later, the company, now free of government controls and facing competition from the world's major manufacturers who have entered the Indian market, still leads the way. Not only that, cars made by Maruti can be seen in all continents. By any yardstick, it is an incredible story, involving grit, management skill and entrepreneurship of a high order. R.C. Bhargava, who was at the helm of the company, and is currently its chairman, co-writing with senior journalist and author Seetha, shows how it was done in this riveting account

of a landmark achievement.

Innovate India Motorbooks

Most literature related to start-ups lack an Indian context. Many young entrepreneurs are enticed by global success stories but are not aware of the numerous examples closer home. Innovate India showcases many such glowing examples from the country. From a Singapore-based scientist of Indian-origin to a next-door middle-class young person, these are the stories of Indian dreams turning into reality. Author Praveen Tiwari explains the key learning from these examples and lays out the path for young entrepreneurs that starts with registration with the Startup Scheme India to attract massive foreign trade. He further discusses a few start-ups that have established new milestones in social entrepreneurship and worked to organise India's

huge unorganised sector. From empowering villagers through sanitary pads to providing them cheap electricity, from offering solutions to water crisis to securing data through blockchain technology, there's a lot to learn from these sagas. Innovate India gives details of the opportunities in some of the country's biggest sectors, such as agriculture and textiles. It also highlights how doing business was part of core Indian ethos and reveals some of the ancient trades and tribes involved in these. A work of rigorous research and hundreds of expert interviews, this is a must-read for all aspiring entrepreneurs. The Maruti Story HarperCollins India Details the role our body plays in how we learn and how we can tap into our body 's

knowledge to excel in all facets of life. Ask someone to point to the part of their body responsible for their intelligence and it is highly likely that they will point at their head. This assumption is understandable, given that, for centuries, from Descartes ' " cogito ergo sum " to the computer age, this is what we have been told to think. And yet we all share common experiences that have revealed the incomparable power of " not thinking " . Have you ever struggled to remember your pin number only to hold your fingers out and type it correctly with your hands, played the piano without focusing on remembering the correct notes or listened to your gut feeling when under the pressure of a big decision? All these instances prove that it is time to stop neglecting the role the body plays in our acquisition of knowledge and to explore how it is that brain

and body combine to deliver what we view as uniquely human intelligence. You never forgot how to ride a bike did you? In this unique new book, social and business anthropologist Simon Roberts looks at the pivotal role that our body plays in how we learn and reminds us of why we should learn to listen to it more often. Drawing upon an incredible range of cutting-edge science, real-life examples and personal experience, Roberts explores the complexity of even the simplest of tasks that humans perform every day and goes on to explain how, with a greater awareness of the processes at work, we can tap into our full potential and excel in any area of our lives. His proposition isn ' t the antidote to big data, cold rationalism, and reductionism. But, as embodied knowledge emerges from our engagement and interaction with the world, the

author underlines why intelligence does not solely reside in our brains. If there ' s a single, practical message to be taken from it, it is that we should give more credit to the role of the body as a resource for learning about and understanding the world. That means a more ' sleeves rolled up ' , engaged and practical way of ' learning by doing ' not by rational detachment.
