"Grade reform and standards-based grading (SBG) is a hotly debated issue in education. As one high school administrator puts it, "Traditional letter grading is probably the biggest elephant in the room in regard to school reform. We start [grading] at a young age, and it becomes all about accumulating points, and it's not about the learning anymore." (Dan Kelley, principal of Smithfield High School, Rhode Island). When students can focus less on the score and more on the learning, great things happen. SBG is even

more challenging in high school. In this book, the authors share their districts' successes moving to alternate assessment methods that promote learning rather than solely achievement. The proponents of grade reform highlight the arbitrary nature of grades, the undue stress experienced by some learners, and the potential interference in the process of learning. On the other hand, opponents reference the lack of accountability and a shift away from content knowledge that is perceived in many alternate assessment models. This book outlines how to remove the negative impacts of grades while still maintaining a high level of

accountability. While the majority of other books in this space provide a rationale for why the shift is necessary, these authors provide the classroom teacher's perspective and concrete examples of how these approaches can be developed and applied. They provide sample assessments, student work samples, an accountability checklist, a sample of their rubrics, and a review of our collected data"--

The thoroughly revised and updated 3rd edition of the book CSAT Paper 1 General Studies 101 Speed Tests with 10 Practice Sets has been updated with the latest questions in all the sections.

No matter where you PREPARE from – a coaching or any textbook/ Guide - 101 SPEED TESTS provides you the right ASSESSMENT on each topic. Your performance provides you the right cues to IMPROVE your knowledge in the various topics so as to perform better in the final examination. It is to be noted here that these are not mere tests but act as a checklist of student's learning and ability to apply concepts to different problems. The book contains 82 Topical Tests + 9 sectional tests + 10 Full length Practice Tests. The complete CSAT paper 1 syllabus has been divided into 7 broad sections which are further divided into 82 topics. The book aims at improving your SPEED

followed by STRIKE RATE which will eventually lead to improving your SCORE. • Each test is based on small topics and contains around 20 MCQs on the latest pattern of the exam. • The various types of questions covered are Statement based, Matching based, Sequencing of events and Feature based MCQs. • The whole syllabus has been divided into 9 sections which are further distributed into 82 topics. • In the end of each section a Sectional Test is provided so as to sum up the whole section. • Finally at the end 10 FULL TESTS are provided so as to give the candidates the real feel of the final exam. The Full Test contains 100 questions as per the latest pattern. • In all, the book contains 2800+ Quality MCQ's in the form of 101 tests. • Solutions to each of the 101 tests are provided at the end of the book. • Separate Time Limit, Maximum Marks, Cut-off, Qualifying Score is provided for each test. • The book also

provides a separate sheet, SCORE TRACKER where you can keep a record of your scores and performance.

Cancer Immunology is intended as an up-to-date, clinically relevant review of cancer immunology and immunotherapy. This volume focuses on the immunopathology and immunotherapy of organ cancers in detail. It clearly explains their immunology and describes novel immunotherapy for specific cancers, including pediatric solid tumors, hematologic malignancies, gastrointestinal tumors, skin cancers, bone and connective tissue tumors, central nervous system tumors, lung cancers,

genitourinary tract tumors and breast cancers. In so doing, it builds on the previous two volumes in Cancer Immunology, placing basic knowledge on tumor immunology and immunotherapy into a clinical perspective with the aim of educating clinicians on advances in cancer immunology and the most recent approaches in the immunotherapy of various tumors. This translational, clinically oriented book will be of special value to clinical immunologists, hematologists and oncologists.
