The preliminary value for the CE Plant Cost Index (CEPCI; the most recent available) for October 2019 decreased from the previous month ' s value, the seventh decline in the last nine months. The decrease in the overall CEPCI was driven by contractions in the Equipment and Buildings subindices. Edinburgh Research Explorer

The annual value for the CE Plant Cost Index (CEPCI) was calculated to be 556.8, down significantly from the an- nual value for 2014. The monthly pre- liminary value for the January 2016 CE Plant Cost Index (top; the most recent available) continued to fall from prior months.

Economic Indicators - Chemical Engineering

The chemical engineering plant cost index (CEPCI) is widely used for updating the capital costs of process engineering projects. Typically, forecasting it requires twenty or so parameters. As an alternative, we suggest a correlation for predicting the index as a function of readily available and forecast macro-economic indicators:
