Chemical Solution Deposition (CSD) comprises all solution based thin-film deposition techniques, which involve chemical reactions of precursors during the formation of the oxide films, i. e. sol-gel type routes, metallo-organic decomposition routes, hybrid routes, etc. While the *Chemical solution deposition techniques for epitaxial ...*

6.5.4.3.2 Chemical Solution Deposition. CSD is a very versatile method as it provides excellent stoichiometry control and coverage of large surface areas. The application procedures used for CSD are quite similar to what is used in the semiconductor industry for application of photoresist, which is a proven high throughput process.
