NOTE: This loose-leaf, three-hole punched version of the textbook gives you the flexibility to take only what you need to class and add your own notes -- all at an affordable price. For loose-leaf editions that include MyLab(tm) or Mastering(tm), several versions may exist for each title and registrations are not transferable. You may need a Course ID, provided by your instructor, to register for and use MyLab or Mastering products. For courses in chemistry. Actively engage students to become expert problem solvers and critical thinkers Nivaldo Tro's Chemistry: A Molecular Approach presents chemistry visually through multi-level images--macroscopic, molecular, and symbolic representations--to help students see the connections between the world they see around them, the atoms and molecules that compose the

world, and the formulas they write down on paper. Interactive, digital versions of select worked examples instruct students how to break down problems using Tro's unique "Sort, Strategize, Solve, and Check" technique and then complete a step in the example. To build conceptual understanding, Dr. Tro employs an active learning approach through interactive media that requires students to pause during videos to ensure they understand before continuing. The 5th Edition pairs digital, pedagogical innovation with insights from learning design and educational research to create an active, integrated, and easy-to-use framework. The new edition introduces a fully integrated book and media package that streamlines course set up, actively engages students in becoming expert problem solvers, and makes it possible for professors to teach the general chemistry course easily and effectively. Also available with Mastering Chemistry By combining trusted author content with digital tools and a flexible platform, MyLab [or Mastering] personalizes the learning experience and improves results for each student. The fully integrated and complete media package allows instructors to engage students before they come to class, hold them accountable for learning during class, and then confirm that learning after class. NOTE: You are purchasing a standalone product; Mastering(tm) Chemistry does not come packaged with this content. Students, if interested in purchasing this title with Mastering Chemistry, ask your instructor to confirm the correct package ISBN and Course ID. written to correspond with an atoms-first approach. The experiments connect to the daily lives of students with engaging, real-world applications and incorporate household items such as Coca-Cola, fertilizer, light bulbs, and aluminum cans. The investigations challenge students while exposing them to recent advances in science. The labs also promote critical thinking by placing the experiments in the context of a practical problem and emphasize data collection and analysis versus mere step-by-step instruction. Some of the exercises are inquiry-driven, while others provide a straightforward method for introducing new laboratory techniques. This manual includes a sample of problem-based and traditional experiments to give instructors flexibility.
