Traditional chemistry starts with the study
of elementary particles, atoms, molecules,
substances, metals, crystals and other
aggregates of matter. Matter can be
studied in solid, liquid, gas and plasma
states , in isolation or in combination.

Chemistry is the study of matter and energy and the interactions between them. This is also the definition for physics, by the way. Chemistry and physics are

specializations of physical science.

Chemistry tends to focus on the properties of substances and the interactions between different types of matter, particularly reactions that involve electrons. Physics tends to focus more on the nuclear part of the atom, as well as the subatomic realm.
