Measurement Flashcards ...*

- In chemistry, the meanings of accuracy and precision are quite different.
- Accuracy is a measure of how close a measurement comes to the actual or true value of whatever is measured.
- Precision is a measure of how close a series of measurements are to one another, irrespective of the actual value.

**Chapter 3 Scientific
Measurement**
Section 3: Scientific Notation.
The study of chemistry can
involve numbers that are very
large. It can also involve
numbers that are very small.
Writing out such numbers and
using them in their long form
is problematic, because we
would spend far too much time
writing zeroes, and we would
probably make a lot of

mistakes!
