Both chemistry and chemical engineering are good subjects to study and the skills learnt can be applied to a variety of different jobs and roles. For chemists typical jobs within the field of chemistry include; analytical chemist, clinical biochemist, forensic scientist, pharmacologist, research scientist or toxicologist. The skills learnt in studying chemistry can also be applied to being an accountant, environmental consultant, patent law, teacher, or science writer.

Fayetteville State University and North Carolina State University offer "3 + 2" Dual Degree Programs. Students can earn two Bachelor of Science degrees in about 5 years-a BS in Chemistry, Computer Science or Mathematics at FSU and

a BS in Chemical Engineering, Computer Engineering, Electrical Engineering or Civil Engineering from NCSU.

Most academic advisors and educators would not recommend to double major in chemical engineering and chemistry. Many engineering programs actually forbid double majors because the course load for just a chemical engineering degree is already significant. Perhaps a minor in chemistry, but not a double major.

**Chemical Engineering Dual Degree (B.S.)** The Department of Chemistry and Biochemistry offers a dual degree program which allows students to begin their studies at UNG and after completing a specified 90-credit-hour curriculum, transfer to an engineering college where they complete a degree in engineering.

**Chemical Engineering Dual Degree (B.S.) - UNG**

The Department of Chemical Engineering offers a dual degree in chemical engineering and chemistry, which requires only one extra semester of courses. The 154-credit hour curriculum lets you pursue both a degree in chemistry and a degree in chemical engineering with opportunities to conduct research in both fields. If you excel in both chemistry and math, the dual degree is a perfect way for you to continue studying the intricacies of chemistry while learning how to utilize that knowledge in ...

Gain expertise in chemical methods and prepare for in-demand industry jobs with our graduate program in industrial chemistry. Our Master of Science in Industrial Chemistry program offers core training in industrial organic chemistry, the chemistry of solid-state materials and polymers, and advanced analytical and physical chemistry.

#### *Chemistry Chemical Engineering Dual Degree*

This course's dual accreditation from both the Royal Society of Chemistry and the Institution of Chemical Engineers and can lead to careers as a chemist or chemical engineer. Chemistry graduates compete very successfully for jobs in all branches of the chemical industry as a result of their recognised expertise.

### Master's Degree in Chemical Engineering | IQS

The Chemistry department participates in a dual degree program in Chemical Engineering with Washington University where a student may receive a B.A. in chemistry from SLU and a B.S. in Chemical Engineering from Washington University after 3 years of study at SLU and 2 years at Washington University.
