Reorganization of Chapters 11  
(Intermolecular Forces, Liquids,  
and Solids) and 12 (Modern  
Materials) reflect that solids and  
materials play an increasingly  
important role in everything from  
daily life to chemical research.  
Frequently, coverage of the basic  
concepts of solids tends to be  
very limited in general chemistry  
courses due to lack of time, very  
descriptive coverage and  
ineffective organization of  
material; this reorganization  
addresses that problem.
