Study Guide for Chemistry,
Structure and Properties Pearson
For laboratory courses in General
Chemistry Engaging students in
real-world applications
Laboratory Manual for
Chemistry: Structure and
Properties provides a series of
experiments written to
correspond with an atoms-first
approach. The experiments
connect to the daily lives of
students with engaging, real-
world applications and
incorporate household items such
as Coca-Cola , fertilizer, light
bulbs, and aluminum cans. The
investigations challenge students
while exposing them to recent
advances in science. The labs also
promote critical thinking by
placing the experiments in the
context of a practical problem
and emphasize data collection
and analysis versus mere step-by-
step instruction. Some of the
exercises are inquiry-driven, while
others provide a straightforward
method for introducing new
laboratory techniques. This
manual includes a sample of
problem-based and traditional
experiments to give instructors
flexibility.
