electrolux 3 way fridge, repair tips

a mate of mine who runs a camping store gave me a grey plastic chescold last week. He said it didn't get that cold (10degrees). I took it camping over the weekend and ran it on gas. it seemed to start to freeze the right hand side of element and was good for the rums, but most likely around 8 degrees (guessing). Can you get them fixed or make modifications to get them working better?
