Understanding date variances on parts applicable to the build date of your Chevelle is vital to a factory-correct restoration, and including them in this book provides a depth of coverage on these cars that is unequalled. Restoring a 1970-1972 Chevelle back to concours correct takes a certain amount of expertise. Thankfully, Rick and Dale have done a lot of the heavy lifting on the research side. With this authenticity guide, you can be confident that you have all the correct components and options accurately and expertly represented for your stock restoration. The C3 Corvette's swooping fenders and unmistakable body style capture the imagination and make it an enduring classic. About a half-million Corvettes were sold between 1968 and 1982, and the unique combination of Shark style, handling, and V-8 performance is revered. Some early C3s, built between 1968 and 1974, are simply too rare and valuable to be modified, particularly the big-block cars. The later Corvettes, built from 1975 to 1982, came with low-compression engines that produced anemic performance. The vast majority of these Corvettes are affordable, plentiful, and the ideal platform for a high-performance build. Corvette expert, high-performance shop owner, and builder Chris Petris shows how to transform a mundane C3 into an outstanding high-performance car. Stock Corvettes of this generation carry antiquated brakes, steering, suspension, and anemic V-8 engines with 165 to 220 hp. He covers the installation of top-quality aftermarket suspension components, LS crate engines, big brakes, frame upgrades, and improved driveline parts. The book also includes popular upgrades to every component group, including engine, transmission, differential, suspension, steering, chassis, electrical system, interior, tires, wheels, and more. Whether you are mildly modifying your Corvette for greater comfort and driveability or substantially modifying it for vastly improved acceleration, braking, and handling, this book has insightful instruction to help you reach your goals. No other book provides as many popular how-to projects to comprehensively transform the C3 Corvette into a 21st-century sports car.

Vintage U.S.-made cars on the streets of Havana provide a common representation of Cuba. Journalist Richard Schweid, who traveled throughout the island to research the story of motor vehicles in Cuba today and yesterday, gets behind the wheel and behind the stereotype in this colorful chronicle of cars, buses, and trucks. In his captivating, sometimes gritty, voice, Schweid blends previously untapped historical sources with his personal experiences, spinning a car-centered history of life on the island over the past century. Packard, Studebaker, Edsel, De Soto: cars long extinct in the United States can be seen at work every day on Cuba's streets. Havana and Santiago de Cuba today are home to some 60,000 North American cars, all dating back to at least 1959, the year the Cuban Revolution prevailed. Though hardly a new part has arrived in Cuba since 1960, the cars are still on the road, held together with mechanical ingenuity and willpower. Visiting car mechanics, tracking down records in dusty archives, and talking with car-crazy Cubans of all types, Schweid juxtaposes historic moments (Fidel Castro riding to the Bay of Pigs in an Oldsmobile) with the quotidian (a weary mother's two-cent bus ride home after a long day) and composes a rich, engaging picture of the Cuban people and their history. The narrative is complemented by fifty-two historic black-and-white photographs and eight color photographs by contemporary Cuban photographer Adalberto Roque.
