The General Motors G-Body is one of the manufacturer's most popular chassis, and includes cars such as Chevrolet Malibu, Monte Carlo, and El Camino; the Buick Regal, Grand National, and GNX; the Oldsmobile Cutlass Supreme; the Pontiac Grand Prix, and more. This traditional and affordable front engine/rear-wheel-drive design lends itself to common upgrades and modifications for a wide range of high-performance applications, from drag racing to road racing. Many of the vehicles GM produced using this chassis were powered by V-8 engines, and others had popular turbocharged V-6 configurations. Some of the special-edition vehicles were outfitted with exclusive performance upgrades, which can be easily adapted to other G-Body vehicles. Knowing which vehicles were equipped with which options, and how to best incorporate all the best-possible equipment is thoroughly covered in this book. A solid collection of upgrades including brakes, suspension, and the installation of GMs most popular modern engine-the LS-Series V-8-are all covered in great detail. The aftermarket support for this chassis is huge, and the interchangeability and affordability are a big reason for its popularity. It's the last mass-produced V-8/rear-drive chassis that enthusiasts can afford and readily modify. There is also great information for use when shopping for a G-

Body, including what areas to be aware of or check for possible corrosion, what options to look for and what should be avoided. No other book on the performance aspects of a GM G-Body has been published until now, and this book will serve as the bible to G-Body enthusiasts for years to come.

What do Henry Ford, Thomas Edison, Mae West, Howard Hughes, John Madden, the Partridge Family, Ken Kesey, The Who, and Barbie have in common? Each had a home on wheels-be it an old converted school bus, a massive RV cruiser, or elegant house car. These celebrity motorhomes are only the frosting on the cake in Douglas Keister's entertaining and informative new book Mobile Mansions. From the eclectic to the exquisite, the luxurious to the rare, Keister's incredible photography showcases the history and diversity of some of the most historic and lovingly restored RVs on the road today. Keister documents an amazing range of vehicles, including small camp cars from the 1920s, house cars from the 1930s, campers from the 1950s and finally modern-day motorhomes that first emerged in the 1960s. Well-known brands like Winnebago, GMC, and Travco are featured as well as one-of-a-kind vehicles like the Lamsteed Kampcar, built by Anheuser Busch, the Zeppelin House Car, and Buckminster Fuller's Dymaxion car. Step inside a wide variety of motorhomes, from diminutive camp cars to diesel-belching, lumbering leviathans complete with saunas, balconies, and gourmet kitchens. Mobile Mansions details this fascinating chapter of America's history with lively text, luscious full color photographs, rare vintage photographs and offers a concise history of the recreational vehicle.

100 Things for Every Gearhead to Do Before They Die CarTech Inc

Nina, said the Squire, "I'm most infernally worried." He was sitting in his wife's morning-room, in a low chair by the fire. In front of him was a table set for tea for one—himself. There were buttered toast and dry toast and preserves, a massive silver teapot, milk jug, cream jug, and sugar basin, a breakfast cup of China tea, and two boiled eggs, one of which he was attacking, sitting forward in his chair with his legs bent. He had come in from hunting a few minutes before, at about six o'clock, and it was his habit thus to consume viands which most men of his age and bulk might have been afraid of, as likely to spoil their dinner. But he was an active man, in spite of his fifty-nine years and his tendency to put on flesh, and it would have taken more than a tea that was almost a meal to reduce his appetite for dinner at eight, after a day in the saddle and a lunch off sandwiches and a flask of sherry. When his tea was over he would indulge himself in half an hour's nap, with the Times open at the leader page on his knee, and go up to dress, feeling every inch of him a sportsman and an English country gentleman. His tea was generally brought to him in his library. This evening a footman had followed him into that room immediately upon his entering the house, as usual, had unbuckled his spurs, pulled off his boots for him, and put on in their place a pair of velvet slippers worked in silk, which had been warming in front of the fire. Only when his coat was wet or much splashed with mud did the Squire change that. He considered smoking-jackets rather effeminate, and slippers, on ordinary occasions, "sloppy." It was only in his dressing-room or on these evenings after hunting that he wore them. Otherwise, if he had to change his boots during the daytime he put on another pair. He was particular on little points like this. All his rules were kept precisely, by himself and those about him. This evening he had told the footman, and the butler who had followed him into the room with the tray, that he would have his tea in Mrs. Clinton's room, and he had marched across the hall with a firm and decisive step, in his red coat and buckskin breeches, between which and his hand-knitted heather-mixture socks showed a white expanse of under-drawers round a muscular calf. Mrs. Clinton sat opposite to him in another low chair, at work on a woollen waistcoat. He always wore waistcoats made by her, thick for the winter, light for the summer, and she knitted his socks for him, of which he required a large number, for he hated them to be darned. He liked to see her working for him like this. He was a rich man, but a woman ought to work with her hands for her husband, whether he was rich or poor. It was her wifely duty, and incidentally it kept her out of mischief. Mrs. Clinton, at the age of fifty-four, with her smooth yellow-grey hair and her quiet and composed face, did not look as if she would be up to serious mischief, even if this and other restrictions were removed from her. She looked up when her husband addressed her, and marked the furrow between his heavy eyebrows. Then she looked down again at her work and waited for him to unbosom himself further.

What's Wrong with My Car CarTech Inc

From Book's Introduction: As traffic volume increases and the highway and interstate system becomes more complex, emergency responders face a growing risk to their personal safety while managing and working at highway incidents. The purpose of this report is to identify practices that have the potential to decrease that risk, as well as to reduce the number of injuries and deaths that occur while responding to and returning from incidents.

"This pioneering study of United States direct investment in Japan will interest academic specialists, business managers, and government policymakers in America, Japan, and elsewhere. Drawing on rich historical materials from both sides of the Pacific, including corporate records and government documents never before made public, Mason examines the development of both Japanese policy towards foreign investment and the strategic responses of American corporations. This history is

related in part through original case studies of Coca-Cola, Dow Chemical, Ford, General Motors, International Business Machines, Motorola, Otis Elevator, Texas Instruments, Western Electric, and Victor Talking Machine. The book seeks to explain why a little foreign direct investment has entered modern Japan. In contrast to the widely held view that emphasizes an alleged lack of effort on the part of foreign corporations, this study finds that Japanese restrictions merit greater attention. Many analysts of the modern Japanese political economy identify the Japanese government as the key actor in initiating such restrictions. Mason finds that the influence of Japanese business has often proved more potent than these analysts suggest. This book offers fresh insights into both the operation of the modern Japanese political economy and of its relations with the world economy."

Introduced in 1997, the GM LS engine has become the dominant V-8 engine in GM vehicles and a top-selling high-performance crate engine. GM has released a wide range of Gen III and IV LS engines that deliver spectacular efficiency and performance. These compact, lightweight, cutting-edge pushrod V-8 engines have become affordable and readily obtainable from a variety of sources. In the process, the LS engine has become the most popular V-8 engine to swap into many American and foreign muscle cars, sports cars, trucks, and passenger cars. To select the best engine for an LS engine swap, you need to carefully consider the application. Veteran author and LS engine swap master Jefferson Bryant reveals all the criteria to consider when choosing an LS engine for a swap project. You are guided through selecting or fabricating motor mounts for the project. Positioning the LS engine in the engine compartment and packaging its equipment is a crucial part of the swap process, which is comprehensively covered. As part of the installation, you need to choose a transmission crossmember that fits the engine and vehicle as well as selecting an oil pan that has the correct profile for the crossmember with adequate ground clearance. Often the brake booster, steering shaft, accessory pulleys, and the exhaust system present clearance challenges, so this book offers you the best options and solutions. In addition, adapting the computer-control system to the wiring harness and vehicle is a crucial aspect for completing the installation, which is thoroughly detailed. As an all-new edition of the original top-selling title, *LS Swaps: How to Swap GM LS Engines* into Almost Anything covers the right way to do a spectrum of swaps. So, pick up this guide, select your ride, and get started on your next exciting project.
