What institutional arrangements should a well-functioning constitutional democracy have? Most of the relevant literatures in law, political science, political theory, and economics address this question by discussing institutional design writ large. In this book, Adrian Vermeule moves beyond these debates, changing the focus to institutional design writ small. In established constitutional polities, Vermeule argues that law can and should - and to some extent already does - provide mechanisms of democracy: a repertoire of small-scale institutional devices and innovations that can have surprisingly large effects, promoting democratic values of impartial, accountable and deliberative government. Examples include legal rules that promote impartiality by depriving officials of the information they need to act in self-interested ways; voting rules that create the right kind and amount of accountability for political officials and judges; and legislative rules that structure deliberation, in part by adjusting the conditions under which deliberation occurs transparently or instead secretly. Drawing upon a range of social science tools from economics, political science, and other disciplines, Vermeule carefully describes the mechanisms of democracy and indicates the conditions under which they can succeed.

Administrative Law: Cases and Materials is the product of a longstanding collaboration by a distinguished group of authors, each with extensive experience in the teaching, scholarship, and practice of administrative law. The Eighth Edition preserves the book’s distinctive features of functional organization and extensive use of case studies, with no sacrifice in doctrinal comprehensiveness or currency. By organizing over half of the book under the generic administrative functions of policymaking, adjudication, enforcement, and licensing, the book illuminates the common features of diverse administrative practices and the interconnection of otherwise disparate doctrines. Scattered throughout the book, case studies present leading judicial decisions in their political, legal, institutional, and technical context, thereby providing the reader with a much fuller sense of the reality of administrative practice and the important policy implications of seemingly technical legal doctrines. At the same time, the Eighth Edition fully captures the headline-grabbing nature of federal administrative practice in today’s politically divided world. New to the Eighth Edition: New insight into the thinking of the Supreme Court’s newest Justices on crucial separation-of-powers questions (especially in excerpts from the Gundy, Kisor, and PHH cases) Multiple excerpts from the controversial citizenship-question Census case Excerpts of judicial responses to Trump Administration initiatives in immigration and environmental law Multiple excerpts from the DAPA case (Texas v. US), as a platform for considering the fate of the DACA program and other immigration controversies Comprehensive updates of materials on Chevron deference, arbitrary-capricious review, substantial evidence review, reviewability of agency action, the appointment and supervision of ALJs, and presidential oversight of rulemaking Professors and students will benefit from: The “case study” approach that illuminates the background policy and organizational context of many leading cases. The functional organization of materials in Part Two which enable instructors to show how doctrinal issues are shaped by functional context. Theoretical materials presented at the beginning of the book that provide a useful template for probing issues throughout the course. A text that is designed to be easily adaptable for use as an advanced course and in schools that have a first-year Legislation and Regulation course. Units that are organized so that many class sessions can focus on a single leading case, reducing the problem of “factual overload” that characterizes many administrative law courses. The case study approach that helps students understand the context within which doctrinal issues arise and the way in which those issues affect important matters of public policy. Reorganization of Part Two to convey a deeper understanding of the characteristic functions performed by administrative agencies.

The People vs. Big Oil—how a working-class company town harnessed the power of local politics to reclaim their community With a foreword by Bernie Sanders Home to one of the largest oil refineries in the state, Richmond, California, was once a typical company town, dominated by Chevron. This largely nonwhite, working-class city of 100,000 suffered from poverty, pollution, and poorly funded public services. It had one of the highest homicide rates per capita in the country and a jobless rate twice the national average. But when veteran labor reporter Steve Early moved from New England to Richmond in 2012, he discovered a city struggling to remake itself. In Refinery Town, Early chronicles the 15 years of successful community organizing that raised the local minimum wage, defeated a casino development project, challenged home foreclosures and evictions, and sought fair taxation of Big Oil. A short list of Richmond ’ s activist residents helps to propel this compelling chronicle: • 94 year old Betty Reid Soskin, the country ’ s oldest full-time

national park ranger and witness to Richmond ’ s complex history • Gayle McLaughlin, the Green Party mayor who challenged Chevron and won • Police Chief Chris Magnus, who brought community policing to Richmond and is now one of America ’ s leading public safety reformers Part urban history, part call to action, Refinery Town shows how concerned citizens can harness the power of local politics to reclaim their community and make municipal government a source of much-needed policy innovation. “ Refinery Town provides an inside look at how one American city has made radical and progressive change seem not only possible but sensible. ” —David Helvarg, The Progressive Motor Gasolines Copyright Office, Library of Congress Practice and Pass the PHR, SPHR, SHRM-CP and SHRM-SCP with 1,000 current and relevant HR Certification Practice Questions With effective Explanations. Inspired by the work of Professor Michael Taggart, this collection of essays from across the common law world is concerned with two separate but related themes. First, to what extent and by what means should review on substantive grounds such as unreasonableness be expanded and intensified? Jowell, Elliott and Varuhas all agree with Taggart that proportionality should not 'sweep the rainbow', but propose different schemes for organising and conceptualising substantive review. Groves and Weeks, and Hoexter evaluate the state of substantive review in Australia and South Africa respectively. The second theme concerns the broader (Canadian) sense of substantive review including the illegality grounds, and whether deference should extend to these grounds. Cane and Aronson consider the relevance and impact of different constitutional and doctrinal settings. Wilberg and Daly address questions concerning when and how deference is to operate once it is accepted as appropriate in principle. Rights-based review is discussed in a separate third part because it raises both of the above questions. Geiringer, Sales and Walters examine the choices to be made in settling the approach in this area, each focusing on a different dichotomy. Taggart's work is notable for treating these various aspects of substantive review as parts of a broader whole, and for his search for an appropriate balance between judicial scrutiny and administrative autonomy across this entire area. By bringing together essays on all these topics, this volume seeks to build on that approach.
