The practical need to partition the world of viruses into distinguishable, universally agreed upon entities is the ultimate justification for developing a virus classification system. Since 1971, the International Committee on Taxonomy of Viruses (ICTV) operating on behalf of the world community of virologists has taken on the task of developing a single, universal taxonomic scheme for all viruses infecting animals (vertebrate, invertebrates, and protozoa), plants (higher plants and algae), fungi, bacteria, and archaea. The current report builds on the accumulated taxonomic construction of the eight previous reports dating back to 1971 and records the proceedings of the Committee since publication of the last report in 2005. Representing the work of more than 500 virologists worldwide, this report is the authoritative reference for virus organization, distinction, and structure.

Cruise Control Troubleshooting and Repair Guide. Fix your own cruise! Cadillac Cruise Control 1970-1976. Many GM (Buick, Chevrolet, Chevy, Chevelle, Oldsmobile, Pontiac, some trucks) 1968-1980. Gasoline engine and AC Delco master transducer cruise control and non-resume. Includes many color pictures of installation, troubleshooting, connections, and details of the pieces and parts. Contains many, many insights and tips. Sections attempt to provide more simplistic approaches to repair your cruise while the bulk of the document attempts to cover every problem known by the author and what to do about every one of the problems. There is a special section on solving the cursed hunting and surging. A section on how can you make your cruise control dash green light readable in the brightest daylight. Where can you buy the correct model and what is it you should look for? Tips on how to repair the entire system, even very deep inside the MT (Master Transducer). Covers every problem the author has run across in fixing systems in the vehicle supporting the cruise as well as the MT itself, going deep inside. Coverage of quick and straightforward approaches to bypass the turn signal switch, to determine where the vacuum leaks are and how to fix them. How to plumb and connect virtually everything for cruise. Diagrams and/or pictures of the hookups. Pictures of the most common wear items, how to recognize when it's worn too far and what to do about it. Tearing down an MT and how to restore. The author shares his own failures and mistakes during repairs. Insights and details into how the MT actually works inside. Common failure modes of the system and common failure modes of the MT and what to do. A shortcut approach to getting your cruise working like new. What to expect from these OEM cruise systems in terms of cruising behavior and performance. Now hands-on with his Cadillacs and cruise controls. He has several vintage Cadillacs and he repairs everything in them. He spent hundreds to thousands of hours cumulatively, every day in the pursuit of the understanding of and the restoration of vintage Cadillacs. He tore apart every element in the cruise control systems of Cadillacs from the mid sixties cars to the late

seventies cars. He learned what systems in the car had to be fixed and how to do so in order to get an acceptable cruise control experience. Here he captures this knowledge in order to help you out. That's a lot of bench time and lots and lots of road tests!

TW Index is a complete and detailed index of everything that has appeared in the SDC Turning Wheels magazine since its inception in 1972. Of greatest importance are the advice items that are indexed by subject (engines, brakes, steering, etc.), model AND year including all individual letters that appear in the Co-Operator column. Historical items are also indexed by subject as well as by the vehicle (model and year) they relate to. If you own, for instance, a 1959 Hawk, TW Index will give you instant access to everything that has been published about your car and much more. Each listing, of course, refers you to the specific issue of "Turning Wheels" and cites the page on which the item begins. Rated "excellent" by Fred Fox and Bob Palma. Volume 1 of Turning Wheels Index includes issues of Turning Wheels from 1972 through 1992 with 10,711 references on 159 pages. Volume 2 of Turning Wheels Index includes 1993 through 2009 with 9,995 references on 158 pages.

While researching his previous study, Arsenal of Democracy: The American Automobile Industry in World

War II (Wayne State University Press, 2013), award-winning automotive historian Charles K. Hyde discovered the many remarkable photos that were part of the era's historical documentation. In Images from the Arsenal of Democracy, Hyde presents a selection of nearly three hundred of these documentary photos in striking black and white, with brief captions. Taken together, the images create a captivating portrait of this crucial moment in American business, military, and cultural history. Images from the Arsenal of Democracy spans from 1940 until the end of the war, presenting up-close, rarely seen views of newly built plants and repurposed production lines, a staggering variety of war products and components, and the many workers behind Detroit's wartime production miracles. The human faces that Hyde presents are especially compelling, as photos show the critical role played by previously underused workers—namely women and African Americans. Images from the Arsenal is divided into chapters by theme, including "Preparing for War before Pearl Harbor"; "Planning Defense Production after Pearl Harbor"; "Aircraft Engines and Propellers"; "Aircraft Components and Complete Aircraft"; "Tanks and Other Armored Vehicles"; "Jeeps, Trucks, and Amphibious Vehicles"; "Guns, Shells, Bullets, and Other War Goods"; "The New Workers"; and "Celebrating the Production Achievements." The first comprehensive and detailed history drawn solely from the surviving photographic record of wartime Detroit, Images from the Arsenal will be appreciated by automotive historians, World War II scholars, and American history buffs.

The traditional Oldsmobile V-8 powered some of the most memorable cars of the muscle car era, from the 442s of the 1960s and early 1970s to the Trans Ams of the late 1970s. These powerful V-8s were also popular in ski boats. They have found a new lease on life with the recent development of improved aftermarket cylinder heads, aggressive roller camshafts, and electronic fuel injection. Author Bill Trovato is recognized as being one of the most successful Oldsmobile engine experts, and he openly shares all of his proven tricks, tips, and techniques for this venerable power plant. In this revised edition of Oldsmobile V-8 Engines: How to Build Max Performance, he provides additional information for extracting the best performance. In particular, he goes into greater detail on ignition systems and other areas of performance. His many years of winning with the Olds V-8 in heads-up, street-legal cars proves he knows how to extract maximum power from the design without sacrificing durability. A complete review of factory blocks, cranks, heads, and more is teamed with a thorough review of available aftermarket equipment. Whether mild or wild, the important information on cam selection and Olds-specific engine building techniques are all here. Fans of the traditional Olds V-8 will appreciate the level of detail and completeness Trovato brings to the table, and his frank, to-the-point writing style is as efficient and effective as the engines he designs, builds, and races. Anyone considering an Oldsmobile V-8 to power their ride will save time, money, and headaches by following the clear and honest advice offered in Oldsmobile V-8 Engines: How to Build Max Performance. Plenty of full-color photos and step-by-step engine builds showcase exactly how these engines should be built to deliver the most power per dollar.
